

# DEEPBRAIN AI

## AI Human Video Synthesis Company

### Company Information

- ✓ World's first commercialized real time video synthesis
- ✓ Real-life application of Interactive AI Human and AI Kiosk

Primary Tech	AI / Video & Voice Synthesis / Chatbot
Industry Sectors	IT / Finance / Retail / Education / Media
Established In	July 2016
Funding Stage	Series B and \$44M (Completed) / Total \$53M

### Solution/Product

- ✓ Seamless omnichannel experience for better customer service & loyalty.
- ✓ AI Human - interactive AI solution for real-time two-way customer engagement and customer service.

Problem

- Keeping pace with the increasing expectations of consumers
- Poor data quality: lack of efficient customer analytics
- Customer engagement across channels
- Pandemic-ridden CS & CX (Contactless interaction / Human Absence / Human error / Wait time etc.)

Solution

- AI Human (SDK/SaaS/Kiosk) is an on-offline interplay between speech synthesis, image synthesis, natural language processing, and facial recognition that converges to provide customer guidance related services on a level similar to that of a real person. The solution also enables more efficient data gathering and data utilization

### Traction

- ✓ Financial
- ✓ Retail
- ✓ EduTech
- ✓ Media
- ✓ Other
