

Elevate Employee Experience with Services for Microsoft Viva

Your employees are the heart of your organization. Ensuring they are engaged, productive and feeling their best is key to building a modern workforce that drives business forward.

Microsoft Viva is a premiere employee experience platform designed to fuel wellbeing, connectivity and productivity no matter when or where your employees work.

Viva works within Teams and leverages the foundational technologies of Microsoft 365, Microsoft Graph and Artificial Intelligence to provide an intuitive experience and maximize the value of your existing productivity tools – all accessible from a familiar, user-friendly interface.

Inspire Engagement with Dell's Modern Workforce Expertise

Creating a workforce experience that is engaging, inspiring and empowers your employees to thrive requires more than tools and technology. Beyond implementation services, Dell's Modern Workforce experts enable meaningful adoption and continued success with proven, human-centric strategies. Jump-start your journey to an elevated employee experience with custom workshops and solutions from our Microsoft-certified professionals.

Microsoft Viva

Viva leverages the foundational technologies of Microsoft 365, Microsoft Graph and Artificial Intelligence. It connects your core productivity apps, including custom integrations, uniting them and making them available from a familiar, user-friendly interface in Teams. Microsoft Viva is currently available via four core modules, with more coming soon:

 **Viva Insights**
