Azure Governance Foundation

AE NV

Azure Governance Foundation

How we work

Project Intake
Understand strategy & context
Identify stakeholders & plan interviews

Evaluate current state
Establish baseline
Identify 'quick wins'

Design future state
Identify improvement areas

Set up governance
baseline & deploy
landing zone

Migrate & improve

Activities
3 interviews
2 iterations (including final
presentation)

Team
Azure Specialist

Deliverables
Cost management quick wins
implemented
Written Azure Platform Guidance
(Option: first version of Azure Landing
Zone deployed)

12000 EUR*

*excluding optional ALZ deployment

Key Disciplines of (cloud) governance

Cost management

Security Baseline

Resource Consistency

Identity Baseline

Deployment acceleration

Cloud governance drivers

- **Business risks**
 - Identifying and understanding corporate risks.

- **Policy and compliance**
  - Converting risks into policy statements that support any compliance requirements.

- **Processes**
  - Ensuring adherence to the stated policies.

6 pillars form Cloud Platform Foundation

Network & Security

Identity & Access Management

Security, Governance & Compliance

Monitoring & Observability

Automation & DevOps

Business Continuity & Disaster Recovery

Platform Foundation & Landing Zone

- The Cloud Governance pillars come together in a Platform Foundation, realized by an Azure Landing Zone

- An Azure Landing Zone is implemented through a set of automated templates, accounting for
  - Scale
  - Security
  - Networking
  - Identity
  - Governance

- AE has the knowledge and expertise to set up and manage a landing zone for you
