# Reimagine the Digital Value Chain

## THE WORLD'S GO-TO MONETIZATION SOLUTION

MATRIXX Digital Commerce Platform (DCP) empowers telcos to compete at web scale with a no-code, cloud native, real-time monetization platform that accelerates innovation, supports digital customer experiences, and scales as you grow.

## WHAT WE OFFER

MATRIXX DCP is a mission-critical network-grade platform that connects networks to customers — consumers and enterprises — and partners, maximizing how you can monetize those network and customer assets. At its core, MATRIXX DCP is a 3GPP-compliant converged charging engine that includes subscription management, promotions and digital payments. Because of our product-led approach, dozens of clients, from new digital brands to Tier-1 operators, trust the same MATRIXX DCP with their revenue streams.

MATRIXX DCP monetizes all customer and partner relationships and is deployed on Microsoft Azure Kubernetes Service, taking advantage of its containerized microservices architecture that abstracts its resources from the underlying platform. MATRIXX DCP on AKS streamlines operations and facilitates the flexible scaling up, down and failover of resources so that the real-time charging processes keep pace with shifting demand and growing digital services traffic.

See what customers are saying:

**“We’ve seen first-hand the value that MATRIXX can deliver... we chose to extend our relationship with MATRIXX because they are ahead of the curve in their work with hyperscalers and we are confident that they’re a trustworthy partner for our strategic journey to the cloud.”**

– Phillip Achermann, Head of Billing, Swisscom

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
