penta.ch

## Access, backup, sync and share your data on Microsoft Azure

SecureBox is a secure corporate cloud file sharing platform. Access your data anywhere and backup, view, sync and share – all under your control.

### Secure file sharing and backup

The secure alternative to public cloud file sharing and backup with bank-level authentication. In multiple languages.

*English, French, German, Italian, Spanish and Arabic*

### Control your data

SecureBox data is stored and encrypted in Microsoft Azure data center. Manage groups and security policies, backed by audit logs.

### Share files

Send links to people inside or outside your company. Set unique passwords, expiry dates, edit and download permissions.

### File synchronization

Desktop and web clients for PC, Mac, iPhone, iPad or Android device. Changes on one device automatically replicate across all.

### Long-term backups and data recovery

Instantly meet data protection and backup legal requirements with up to five-year data backup and recovery options.

### Versioning

Previous version of modified files are automatically retained and can be restored, while automatically managing storage space.

### Regulatory compliance

Auditor-ready compliance reports included. Independent ISAE 3402 audits for regulatory compliance needs.
