# UNLEASH THE POTENTIAL OF DATA AND ANALYTICS IN THE CLOUD

Organisations know there's great value in data, but unlocking that value is often a challenge. We support clients through every stage of their journey with data and analytics to help them realise their vision of becoming data driven.

## CHALLENGES

Data is a load bearing pillar of digital transformation, providing the information on which to make quick and effective business decisions; the foundations for automation and AI.

It is critical that organisations are able to move quickly, responding to a fast-changing world and customer base.

## IDEAL SOLUTION

We focus on high-quality analytics delivered to end users, and establish rapid, iterative processes for continuous releases.

BJSS have tried and tested data platform accelerators that provide a secure and robust foundation to allow you to quickly deliver value from data.

## DESIRED OUTCOMES

- Actionable insights delivered to business.
- Self-service access to data and tooling.
- Data platform architecture, aligned to strategic goals and vision.
- Secure, scalable and compliant design.
- Improved efficiencies for analytics teams.

# Enterprise scale analytics workshop

**BJSS offers a free 1-hour briefing for organisations who are looking to:**

- Define and execute their data strategy.
- Improve their use of and access to data.
- Understand organisational maturity creating data products.
- Leverage cloud data platforms to generate insights and become data driven.
- Evaluate technologies and architectures to deliver analytics value to users.
- Plan and execute data migrations.
- Reduce time to analytics through iterative releases of value.

# 1

## A PROVEN APPROACH AND FRAMEWORK

We will present the BJSS, CAF for Data aligned approach to scalable and secure data platforms, data governance, machine learning and delivering value through DataOps.

# 2

## UNDERSTANDING YOUR ANALYTICS REQUIREMENTS

Together, we will understand and prioritise your business objectives to place high-quality data and tooling in the hands of your analysts and data scientists.

# 3

## IDENTIFY PRIORITY AREAS OF FOCUS

We will help you identify areas that need further analysis in order to design target state architecture and roadmap.

# BJSS

## Data and analytics specialists

BJSS supports you to develop and deliver your data strategy.

We provide end-to-end expertise delivering your data platform and effective data-driven solutions. Our consultants help you to embed data, advanced analytics and machine learning as core business services and put knowledge directly in the hands of key business users.

### DEFINE – TECHNOLOGY & DELIVERY STRATEGY

We provide specialist data consultants to work with you to understand business objectives, assess current architecture and capabilities, and define the optimal state of your data platform. Our approach aligns with well architected Azure solutions and the CAF for Data.

### DESIGN – DIGITAL SOLUTIONS

Our data architects can design your data platform from the ground up, ensuring performance, resilience and security are considered from day 1. We will optimise the design to your target operating model and assist adoption as a business service.

### DELIVER – ACCELERATED DELIVERY

Our full-stack delivery teams utilise data platform and analytics accelerators to reduce time to actionable insights and realisation of business value. We provide expertise across technologies and architectures, backed with advanced Azure specialisations.

## Customer Success – Enterprise scale analytics platform build

BJSS worked with a specialist UK financial services group to modernise their data and analytics capability and migrate to a new Azure data platform. The new architecture, based on CAF for Data, removed data siloes and brought together disparate data systems by providing a federated data governance model and aligning teams to data products.

BJSS were able to utilise this platform, and through a DataOps approach to delivering value, rapidly iterate on data models and dashboards to provide insights that helped optimise a critical business process. Efficiencies were gained by reducing the time to insights from months to days.

BJSS used their expertise in developing data platforms to align to current technology and data strategies and develop a target operating model to maximise the value from insights and analytics.
