

Greater security at lower cost with the expertise and power of Microsoft Security solutions

Reduce costs with an integrated solution

Secure hybrid environments effectively

Employ the world's largest and most trusted security presence

- Protect against every intrusion scenario by consolidating to a single provider and dashboard, eliminating extra IT security infrastructure
- Empower coordination of protection, detection, response, and prevention across both Microsoft and 3rd party solutions on one platform
- Securely manage ID & access across devices
- Reduce licencing costs up to 52% with integrated cloud solutions, a significantly lower TCO than a patchwork approach

- Protect against other cloud and on-premises infrastructure as organisations move to public clouds
- Reinforce and keep pace with growth in security data
- Accelerate security outcomes while reducing hardware and operational costs

- Best in class across five security solutions categories
- Ensure confidence with Microsoft Security's impeccable legacy
- Trust resources that process a greater volume of data than anywhere else
- Fight against threats with config monitoring, EDR, application control, network segmentation (with support extending to container and serverless workloads)

Simplify and fortify security with Microsoft
