

# Azure Purview Foundations Implementation

## Manage, Discover, and Govern Your Data Better

Azure Purview is a unified data governance solution that helps you manage and govern your on-premises, multi-cloud, and software-as-a-service (SaaS) data. Our Purview Foundations will help you begin to adopt Azure Purview and understand how to create a holistic, up-to-date map of your data landscape with automated data discovery, sensitive data classification, and end-to-end data lineage, all while enabling your data consumers to find valuable, trustworthy data.

**Manage Growing Data Landscape**

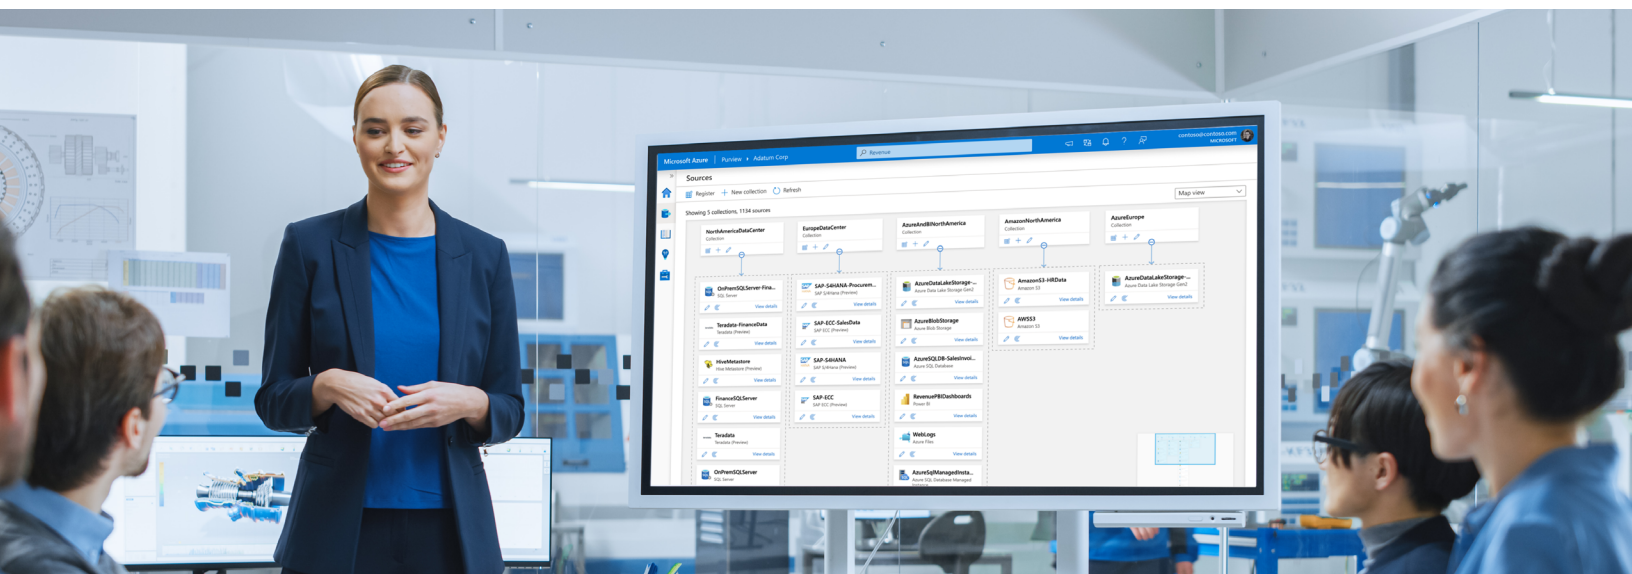

**Overcome Operational Silos**

**Increase Data Agility**

**Comply with Industry Regulations**

# Map & Govern Data Across Your Entire Organization

## Our Azure Purview Foundations Implementation Includes

2-3 weeks | \$20,000 fixed fee (~\$500/month expected Azure cost)

- Collaborative workshop to envision planned architecture, security, and to understand broad integration and connection points.
- Finalized design of Purview and planned data sources.
- Finalized design of assigned user roles and selected Purview tiers.
- Configure data discovery with Data Catalog.
- Automate metadata scanning and enable data lineage collection.
- Demonstrate search, browse, and curate features.
- Azure Purview deployed with Unified Map.
  - Map, load, and set scan frequency for up to five data sources.
  - Creation of one custom classification (default: government, financial, personal, and security included).
  - Import existing Business Glossary terms and create up to two custom term templates.
