Making the Case for Migrating Healthcare to Azure

Migrate to Azure with confidence, with the help of Cloudticity

Why migrate to Azure with Cloudticity?

Microsoft Azure has helped thousands of healthcare organizations migrate to the cloud, from enterprise provider networks and payers to public sector agencies and technology partners all the way to regional and municipal medical centers. Large or small, these organizations experienced a number of benefits – from substantial IT cost savings, to improvements in productivity, security, and business agility. Combining the capabilities and experience of Azure with Cloudticity delivers a complete and proven approach for migrating to the cloud so that you can have confidence in your ability to make your cloud migration pay off.

Make your Azure migration pay off with Cloudticity

Migrating with Cloudticity to the cloud is the first step to modernizing your healthcare organization and creating a foundation for rapid innovation and operational resilience. With Cloudticity, you gain access to a mature and proven set of tools and resources, together with deep expertise and first-hand experience, allowing you to streamline migration and then maintain operational excellence, security, and compliance going forward.

Oxygen

Cloudticity Oxygen is an Azure-native, next-gen managed cloud solution for modern healthcare enabling a seamless transition to the cloud. After migrating to Azure with Cloudticity, Oxygen sits over your environment and its resources and functions as a monitoring and optimization umbrella, continuously scanning for alignment with HIPAA, HITRUST, and NIST, remediating any drift from best practices. Gain business agility, high availability, continuous security, and built-in cost optimization – while maintaining peace of mind.

# Navigating the migration phases with Cloudticity

The migration process has three phases of activity: 1) assess and build the business case, 2) mobilize including due diligence and detailed planning, and 3) migrate and optimize. As you iterate and migrate more applications, Cloudticity helps you drive repeatability and predictability in processes and procedures and deploys Oxygen for security, compliance, and operational oversight.

Azure migration readiness assessment

Gauge the cloud-readiness of your healthcare business by completing the Cloudticity migration readiness assessment, which is split into 2 areas of focus:
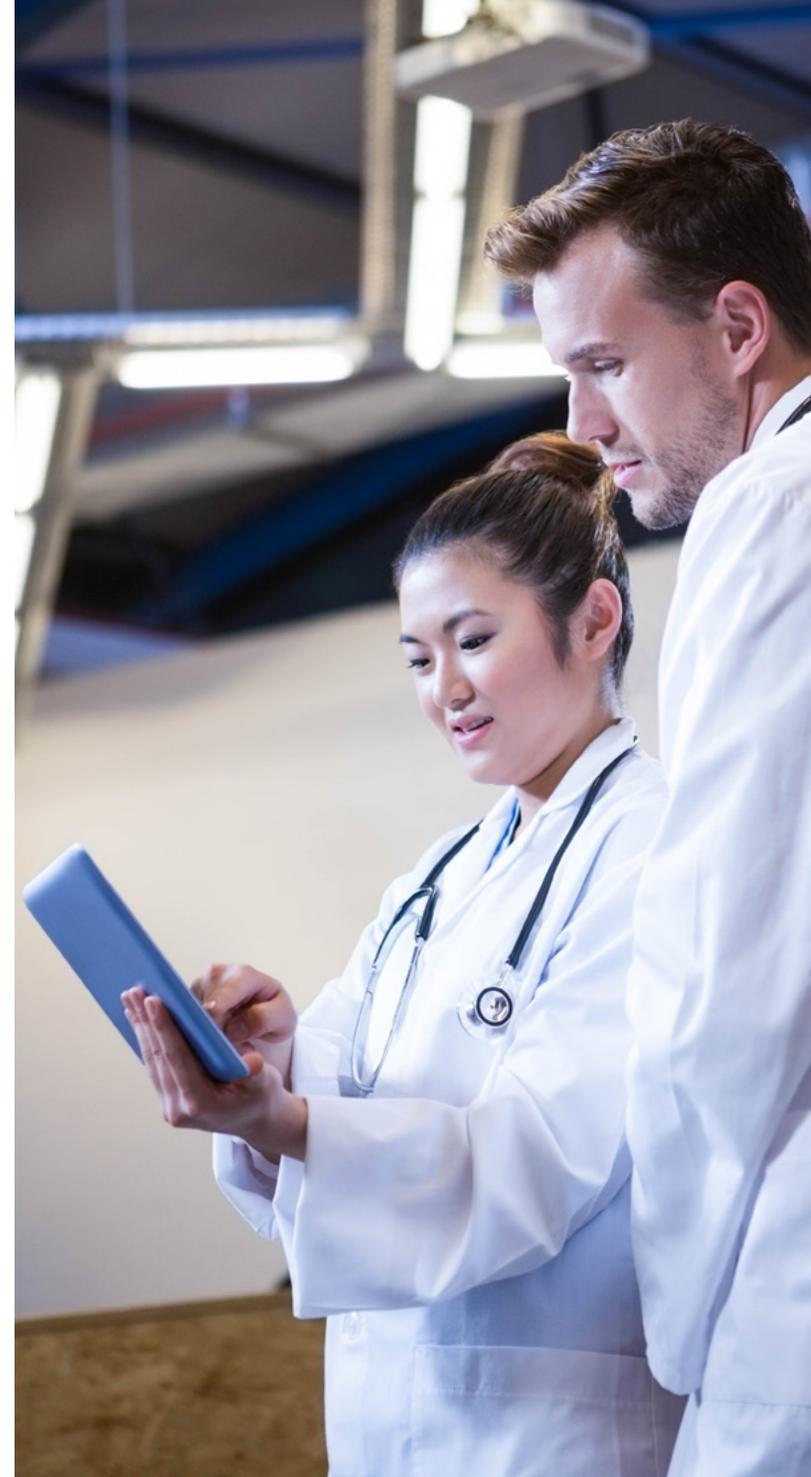

Business capability assessment

- **Business:** value realization
- **People:** roles and readiness
- **Governance:** prioritization and control

Technical capability assessment

- **Platform:** applications and infrastructure
- **Security:** risk and compliance
- **Operations:** hybrid and dynamic

The assessment will help to identify your level of readiness and will be accompanied by a plan/proposal for your cloud migration journey with Cloudticity. Learn More Today.
