

FASTFORWARD FOR COMPUTER VISION

WHY NEXER?

- ✓ Advanced Specialization certification in AI and Machine Learning
- ✓ A unified team of specialists and experts with advanced training and extensive experience in the world's leading technology
- ✓ The highest level of standards across the industry
- ✓ Continuous attentive customer support from our expert customer service team
- ✓ Best-in-class training tools and programs
- ✓ Consultative expertise with the industry's best Microsoft implementation and deployment

INTRODUCTION

Clients everywhere recognise the benefits delivered to their customers through the application of Computer Vision. Many already have strategic investments with Microsoft and want to explore Azure Computer Vision use cases to solve critical business challenges.

While Microsoft's Azure Computer Vision services have created new possibilities, deep expertise with custom Machine Learning can be required when standard algorithms are insufficient.

At Nexer Insight, we meet our client's complex business challenges by building applications that unlock, analyse, and understand their data using live video analytics with the power of Microsoft Azure IoT, Data, and AI.

THE OFFER

Nexer FastForward for Azure Computer Vision is a custom-developed program that takes a service use case from idea to proof of concept within three months, demonstrating benefits in the field.

Our experts collaborate with your key stakeholders to identify promising Computer Vision client use cases, assess their business value and deploy one or more in a Proof of Concept.

The result is a solution tailored to your business needs and industry dynamics that help you automate manual processes like image classification, object detection and tracking to transform your operations. By applying Computer Vision features to streamline processes, such as image processing, robotic process automation and digital asset management:

- Automate operations to improve performance and uphold higher standards of quality control
- Increased consistency, speed, and accuracy of outcomes with automation
- Extract powerful insights from data to make accurate forecasts and informed recommendations
- Eliminate the guesswork involved in data-driven decisions
- Offer stakeholders a unique experience with data tailored to their requirements
- Become more secure, scalable and industry compliant in your operations

Successfully implemented for clients including Boliden, Nordic Construction Company, and a Global Container Port Operator, FastForward is a practical and proven way for clients to realise the potential of Azure Computer Vision.

"So far, we have shown that the technology works for us, so I am convinced that a continued collaboration within this partnership can solve our safety challenges when working with tower cranes."

- Claes Henschel,
Digitization Project
Manager, Nordic
Construction Company

NEXER FASTFORWARD FOR COMPUTER VISION

AGENDA & DELIVERABLES

ANALYSE PHASE (1 Week)

- Stakeholder interviews & workshop
- Azure CV architecture & design workshop
- Infrastructure discovery workshop
- Requirements analysis

IMPLEMENT PHASE (4-8 Weeks)

- Azure CV architecture deployment
- Azure application development
- Analytics dashboard development
- Azure device provisioning & security review
- Pilot validation & testing
- Handover of pilot to client

ASSESS PHASE (1 Week)

- Project outcome review
- Next steps joint planning

ABOUT NEXER INSIGHT

Nexer Insight, a part of Nexer Group, specialise in the power of Microsoft Azure Computer Vision to rapidly deliver practical solutions for clients, improving the experience of customers and employees while reducing costs.

As exclusive members of the Microsoft IoT Elite Program and Advanced Specialization certification in AI and Machine Learning, we meet our client's transformation needs, from strategy to concept, development, and operation.

Nexer Group is a global company with a Swedish heritage of entrepreneurship and innovation. Nexer has 2,300 employees in 15 countries focused on delivering business transformation through strategy, technology, and communication.

PRICING

Costs are subject to the scope of requirements and our team will discuss, and agree this with you, before any work is carried out.
