

Today's organizations must adapt quickly to change, using new technologies that fuel competitive advantage, or risk getting left behind. That's why it's imperative to make the most of big data, the cloud and intelligence capabilities, all of which help companies accelerate their speed of business through smarter decision-making and faster execution.

Data, analytics & AI accelerates digital transformation

The convergence of cloud, data, and intelligence provides data driven insights and action.

Intelligent solutions will enable differentiation

Incorporate cognitive understanding to make applications "smarter," through services that add intelligence into applications.

Utilize intelligent agents to interact wherever your users are communicating, from text/sms to Skype, Slack, Office 365 mail and other popular service cloud solutions.

Business analytics that are intelligent, trusted, and flexible

Bring intelligence to where your data lives on the most secure, compliant and scalable platform, with any language on any data, anywhere.

Preconfigured solutions for common IoT scenarios – remote monitoring, asset management and predictive maintenance.

Enterprise-grade security and compliance

Protect against threats through vulnerability scans and access control.

Employ full visibility into your environment and app telemetry.

Streamline and automate security checks and enforce compliance requirements.

Atmosera's Data, Business Analytics & AI Services

- **Intelligent Solutions** - Atmosera can employ solutions and processes to drive intelligence throughout your business in areas including: Operations, Marketing, Finance, Workforce, Service and Sales.
- **Data & Analytics** - With real-time analytics, you can make the right decisions at the right time to maximize value and minimize risk. By anticipating behaviors and identifying trends, at the individual customer level and at scale to drive your business instead of being driven by it.
- **Globally Distributed Data** - With globally distributed data, applications can transparently replicate data anywhere in the world, enabling a fast response time and high availability.
- **Data Modernization** - Atmosera can move data to Azure with options including: Managed Instances, Azure SQL Database, SQL Server on virtual machines, MySQL, PostgreSQL, Azure Synapse Analytics, Azure SQL Hyper-scale, and hybrid options, including Azure Databricks and Delta Lakes.
