Azure Active Directory

Secure access for a connected world

Azure Active Directory (Azure AD), part of Microsoft Entra, provides a complete identity and access management (IAM) solution with integrated security to manage and protect all your users and data. Azure AD is a multicloud identity platform that integrates with Microsoft 365, Windows, Intune, thousands of SaaS applications, and your hybrid identity environment to meet the needs of today's enterprise.

Azure AD offers rich signal and security controls that empower employees, partners, and customers to be productive by providing seamless, secure sign-in experiences to applications and services while protecting identities from threats. Secure user credentials by enforcing strong authentication and Conditional Access policies. Efficiently managing identities ensures that the right people have the right access to the right resources.

How Axiad Cloud integrates with Azure AD

The Axiad CBA for IAM integration with Azure AD implements passwordless, phishing-resistant authentication for Azure AD protected applications and services. Customers can easily use the same certificate-based credentials issued by Axiad CBA for IAM to sign into their workstation, on-premises resources or Azure AD protected resources. Axiad uniquely provides an integrated view of all issued credentials and enables end user self-service for credential issuance and management. Customers no longer need multiple tools for rollout or a separate system to manage authenticators and credentials.

Customer Benefits

- **Increase IT efficiencies:** All end user credentials can be managed with the Axiad Unified Portal. Axiad MyIdentities uniquely provides self-service into visibility and management of all authenticators, such as Windows Hello for Business and certificate issuance and management

- **Improved user experience:** Axiad MyCircle empowers the workforce to issue credential resets within their trusted circle, thereby avoiding lost time and cost of having to contact IT

- **Reduced friction:** Axiad AirLock provides help desk automation by eliminating temporary passwords, automating administration, and enabling self-service credential management. Organizations can replace the use of multiple tools for enterprise deployment, management, and support of authenticators and credentials
