NextGen Windows Workshop

Today, organizations have a growing need to support a hybrid workplace. Things look different when the IT team isn't down the hall – new employees need to be onboarded, distributed teams need to be connected, specialized workloads need to be enabled, and new projects need to be scaled-up. While doing all this remotely, IT also needs to ensure security and meet ever-changing regulatory requirements.

Enable secure and productive remote work with Microsoft

Whether you need to provide a remote desktop and application experience to your remote workforce or enable employees to stream their personalized desktop, from the cloud, on any device, Microsoft provides you comprehensive virtual computing options to meet your unique hybrid work requirements, all manageable through a unified management solution.

Deliver desktop experiences virtually anywhere with flexible options

Get built-in intelligent security

Deploy and scale in minutes with simplified deployment

Optimize cost with flexible pricing options

Take the first step

Get an executive deep dive of Microsoft's end user computing options from a leading Microsoft partner and learn how these solutions can be used to deliver a secure and productive desktop experience from anywhere.

Our delivery process   🗓 Duration: 3 Days   💲 Cost: $5,000

Envision	Assess	Share
• Review your specific hybrid work scenarios and end-user computing goals and objectives. • Get an overview of your current physical and virtual devices landscape.	• Provide an overview of Microsoft Next-gen Windows solutions for all your requirements: Windows 365, Azure Virtual Desktop, Microsoft Endpoint Manager, and Windows 11 Enterprise.	• Showcase the key endpoint management capabilities: provisioning, configuration, security baseline, and optimization settings. • Share the final results, along with next steps documentation.

Netrix can take your Microsoft-powered infrastructure to the next level, providing you the engineering and services expertise to help you customize, automate, and analyze your entire environment.
