

Delivered Predictably.

The most reliable methodology for a functioning cloud environment.

IT projects are not a place where surprises are good. This is a place where boring is good and predictable is better. Here is where you capture the advantages of the cloud predictably and specifically. We deliver a focused and defined way to migrate and manage your cloud infrastructure, with no surprises.

A large percentage of cloud migration projects fail to deliver expected business outcomes. Our proven methodology for migrating and managing cloud environments has delivered expected results for hundreds of computer software, state and local government, finance and insurance customers.

We help IT teams with a lack of resources manage their infrastructure more easily and economically by using our technical know-how and project management capabilities to deliver completed cloud migration projects that actually work and managed services that give you peace of mind.

For organizations that need to simplify, modernize, reduce risk, or increase the efficiency of their infrastructure, Dataprise's professional and managed services define the milestones that deliver an expected and completed outcome.

PROFESSIONAL SERVICES

- + Azure Migration
- + 365 Migration
- + SQL Modernization

MANAGED SERVICES

- + Azure Operational Managed Services
- + 365 Operational Managed Services
- + Managed Security Services
- + Managed Backup / Disaster Recovery
- + Hosting / Colocation

Industries

We offer the tools, expertise and project management capability to deliver and manage fully functioning cloud infrastructure.

FINANCE & INSURANCE

TECHNOLOGY & SOFTWARE

STATE & LOCAL GOVERNMENT

AZURE MIGRATION

Dataprise works with customers nationwide who have interest in the cloud but do not know where to begin. We have migrated thousands of physical and virtual servers to the public cloud with hundreds of different use cases. Rely on our experience and the standardized processes we have developed to reduce your cost, migration time, and realize a return on your investment in the cloud.

365 MIGRATION & MANAGEMENT

Eliminate the hassle of an on-premise exchange or email server that routinely requires updates and maintenance. Migrate to Office 365 and experience a more redundant server backend and larger mailboxes without hardware cost, maintenance or upgrades. Dataprise can migrate and manage complex email systems for you.

DATA PLATFORM MODERNIZATION

Reduce the cost, risk and system dependencies of legacy applications. Assess legacy application portability and update those legacy applications to emerging technologies and platforms.

MANAGED SERVICES

Choose the level of support that will maximize your business outcomes. Our bundled managed services allow you to select what works best for your team and the business you serve, from CSP complimentary support, to basic or advanced level operational support.

SECURITY SERVICES

In the modern age, there is no more important topic to daily IT operations than security. Let's take every precaution to ensure the best security practices and top-notch security processes are implemented for your organization.

BACKUP AND DISASTER RECOVERY

Securely extend your on-premises backup storage and data archiving solutions to the cloud—reducing cost and complexity, while achieving efficiency and scalability.

Method

Simplifying the complex into an actionable and systemetized approach.

Dataprise Systems Assessment Tool

Learn the details of your entire IT infrastructure.

The Dataprise Systems Assessment Tool provides server core level inventory, cost & performance. Detailed reports may be provided to you with no on-site technical engagement required.

YOUR CUSTOM REPORT WILL PROVIDE:

- Inventory:** All network, server hardware and operating systems
- Current Costs:** Total infrastructure estimated from server core level detail
- Performance:** Data from 55 system metrics
- Right Sizing:** Optimization recommendations for each server
- Cloud Candidacy:** Identification of servers & operating systems that could migrate
- Hybrid Cloud:** Potential deployment recommendations

SAMPLE REPORT #1

Description	Virtual Machines	Physical Machines	Total
Device Count	168	70	238
Estimated On-Prem. Monthly Cost	\$51,273.45	\$37,595.00	\$88,868.45
Estimated Azure Monthly Cost	\$35,166.77		\$35,166.77
Monthly Savings (\$)			\$53,701.68
Monthly Savings (%)			60%
Airnet Managed Services (Optional)			\$9,097.65
Estimated Azure Monthly Cost w/ Optional Managed Services			\$44,264.42
Azure Monthly Savings w/ Optional Managed Services			50%

SAMPLE REPORT #2

Description	Virtual Machines	Physical Machines	Total
Device Count	2658	*	2658
Estimated On-Prem. Monthly Cost	\$483,965.81		\$483,965.81
Estimated Azure Monthly Cost	\$284,060.62		\$284,060.62
Monthly Savings (\$)			\$216,080.79
Monthly Savings (%)			41%
Airnet Managed Services (Optional)			\$71,108.04
Estimated Azure Monthly Cost w/ Optional Managed Services			\$355,168.66
Azure Monthly Savings w/ Optional Managed Services			27%

PLANNING & MIGRATION EFFICIENCY

Dataprise's experts are proficient in determining server dependencies, consolidating systems, and identifying optimization candidates to accurately right size your infrastructure. Work with Dataprise's team to create a phased and/or hybrid migration approach that fits your needs.

INTELLIGENT OPTIMIZATION

No longer live with disjointed, legacy architectures! Dataprise can modernize environments to create efficient, unified, and common data services across the entire IT infrastructure. Reduce cost and excess usage while creating seamless integrations to new and pre-existing environments.

OPERATIONAL MANAGED SERVICES

As an option, Dataprise provides 24/7/365 expert operational systems management. Ongoing optimization, tuning, monitoring, provisioning, and troubleshooting can all be done through teams of Dataprise experts dedicated to your systems.

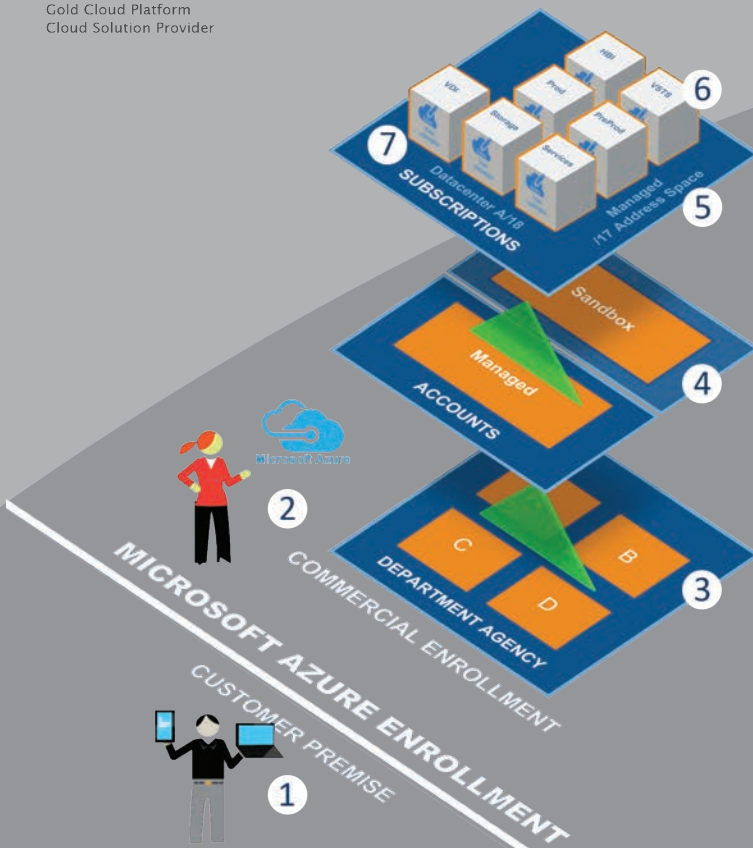

Dataprise Azure Foundations

Dataprise’s Azure Foundations is a turnkey Azure deployment framework created to make Azure setup and deployment standardized, scripted, and scalable. In one meeting, customers can be fully set up and deployed to Azure with all required subscriptions, segmented and network infrastructure, and resource groups.

Microsoft Partner

Gold Cloud Platform
Cloud Solution Provider

- 1 On-prem or standalone domain of the tenant. Foundations will create an integrated hybrid environment.
- 2 Enterprise Enrollment is for MAC is established. The Enterprise Administrator delegates to Departments.
- 3 Departments act as containers for Accounts and are used to designate financial and security barriers. Departments are optional but strongly recommended.
- 4 Two Accounts capture the patterns of Managed and Sandbox. Account Administrators control deployment and administration of subscriptions.
- 5 Managed Accounts in each Department are allocated /17 address space. This address space is carved into standard subnets for each subscription.
- 6 Default subscriptions compartmentalize workloads based on security, secure development, and lifecycle management.
- 7 Each region is allocated /18* with VPNs between subscriptions to enable Georedundancy Capabilities for managed workloads.

A Turnkey Azure Deployment: Simple, Easy, Efficient

- Pre-architected framework
- Removes guesswork
- No complicated, expensive planning steps
- Set up & configure in one meeting!

20 Servers or 20,000, We're Your Azure Experts.

With more than 20 years of data center management and IT infrastructure deployment experience, Dataprise is uniquely qualified to perform your cloud assessments and migrations.

WHAT YOU NEED TO KNOW

- Streamlines planning and deployment of Azure resources in a standardized, scripted way.
- Incorporates redundant Azure regions, including security-hardened production, high business impact, pre-production, production, storage, and more.
- Provides a secure, flexible Azure environment that is already deployed and organized for you.
- Significantly reduces the amount of initial work and investment required to get Azure VMs up and running.

HOW TO GET STARTED

Azure Foundations is deployed in one meeting by answering only three pre-planning questions:

1. What Azure Regions do you want to use?
2. What three letter Azure naming designation do you use?
3. What IP range is needed? (A/16 is deployed by default)

Azure Foundations can be tailored to fit specific customer requirements. It works best when combined with the Airnet Systems Assessment Tool (ASAT). This tool provides detailed inventory, performance, right-sizing, and cost data on your IT infrastructure.

WHAT DO YOU GET

1. **All required subscriptions**
 - Sandbox
 - Services
 - Dev-Test
 - Production
2. **Segmented infrastructure**
3. **Core network infrastructure**
 - Required virtual networks
 - Subnets defined by workload
 - Network security groups
 - Network gateways and VPN endpoints
4. **Resource groups**

ABOUT DATAPRISE

Founded in 1995, Dataprise is the leading strategic IT solution provider to midmarket IT leaders who believe technology should allow you to be the best at what you do. Dataprise's unbeatable IT solutions and services are tailored to the needs of strategic CIOs and provide best-in-class managed security, network, infrastructure, collaboration, and end-user solutions. Dataprise has offices across the United States to support our clients.
