Software SADI

Smart Automation & Documents Integration

3 solutions in one software

Intelligent document scanning + Robotic process automation + Integrating of data into your ERP

ALEXSYS
SOLUTIONS

Still seizing manually your bills and commands in your ERP system?

Use artificial intelligence to manage your accounts payable and order management process.

In a technologically advanced world, it seems abnormal that some companies still have to manually enter invoices in their ERP paper or PDF and customer purchase orders. Not only this treatment manual is prone to errors, but it is also expensive and inefficient.
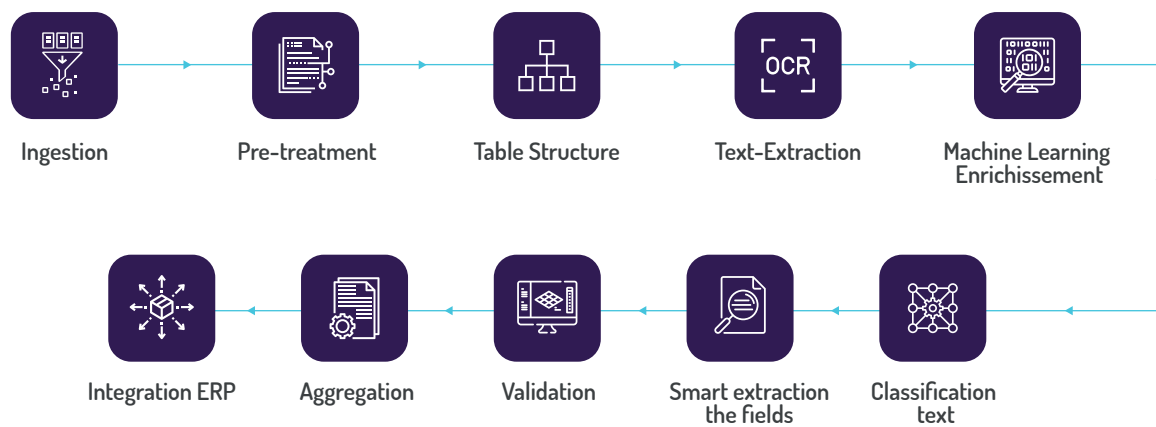

Companies now have the opportunity to reduce costs, avoid errors and save valuable time using powered automation by top-notch artificial intelligence technology in their system ERP.

SADI

The software
Smart Automation & Documents Integration (SADI)

The time of digital transformation with digitization, automation and integration has come.

SADI software works with the latest document analysis technology and the most advanced, which recognizes relevant data in PDFs or images scanned documents and converts them into structured format.

The process, including our complementary automation and integration module, is as simple as when a customer sends an order by e-mail, for example fax or on paper, or when a supplier sends an invoice, it is automatically supported by our SADI software and processed in your ERP

.

| Ingestion | Pre-treatment | Table Structure | Text-Extraction | Machine Learning Enrichissement |

| Integration ERP | Aggregation | Validation | Smart extraction the fields | Classification text |

If certain data or certain fields are not recognized by Intelligence Artificial, an employee is manually notified to match the information missing items received in the document. Through this process, artificial intelligence continuously adapts and learns from the different inputs made by the users.

SADI software integration module transparently retrieves data in a structured format and imports them into your ERP (SAP, Dynamics, SalesForce, ...) under the form of a purchase order or supplier invoice, while informing the user.

ALEXSYS
SOLUTIONS

SADI

SADI :
An economical solution in terms of time and costs

⁙ PROFITABILITY

- Increase your productivity by saving your team time.

- A rapid return on investment (ROI) reduces the costs of production.

- Overall costs decrease due to robotic automation of process.

⁙ TIME SAVING

- Reallocate your team's time to more meaningful tasks.

⁙ HIGH QUALITY

- Automatic data recognition, validation and integration from various sources such as electronic copies, pdf, jpg, etc. in your ERP solution.

- SADI software based on artificial intelligence enables automation and has self-learning capabilities
