

DB- SPAZIO

Desk Booking Solution for a SMARTer Workspace

DB Spazio is a workspace management solution that aids organizations in streamlining operations and reducing real estate costs. The desk booking solution provides better control of office real estate involving booking, tracking and deallocation supporting transformation of your work environment.

Powered by Digital Blanket

DB Spazio is built on the Digital Blanket Enterprise IoT platform- a unique digital layer that enables automation, integration, benchmarking and analysis to empower your organization's digital transformation journey. Digital Blanket provides several Workplace Management solutions and creates an intelligent correlation layer for Unified Command & Control.

Features

<h3>Flexible Seating Options</h3> <p>DB Spazio allows you to easily set-up and book various seat types- flexi-desk, hot desks and fixed seats</p>	<h3>Seamless Booking</h3> <p>UI/UX designed for easy 3 step process and tested for millennial employee acceptance with average time of 10 seconds or less. Options available for extending the booking, early check-out and cancellation</p>	<h3>Multiple Orientation Options</h3> <p>Offers deployment flexibility with screen orientation in both portrait and landscape modes</p>	<h3>Curated Content</h3> <p>Curated content for desk-booking with embedded seat numbers allowing single view of the floor / wing with or without zooming</p>
<h3>Multi-platform Support</h3> <p>Works seamlessly across all browsers, kiosks & touch screens. It also supports booking on-the-go with a mobile App</p>	<h3>Occupancy Authentication</h3> <p>Employee seat authorization using dynamic QR Codes confirming occupancy, if desk sensors are not available</p>	<h3>Reports & Analytics</h3> <p>MIS reports enabling better resource management and optimal space utilization</p>	<h3>Workspace Customization</h3> <p>Create workspace specific attributes that enable users to identify desks specific to their needs</p>

SMARTer Workplace Integrations with Digital Blanket

- Desk booking integrates with WayFin for ease of locating seats across the facility
- Integrates with AUTomate to activate "Way to Fire Escape" automatically in screens during emergency, enhancing security measures
- Integration with energy management system for occupancy-based controls of lighting and HVAC systems reducing energy costs

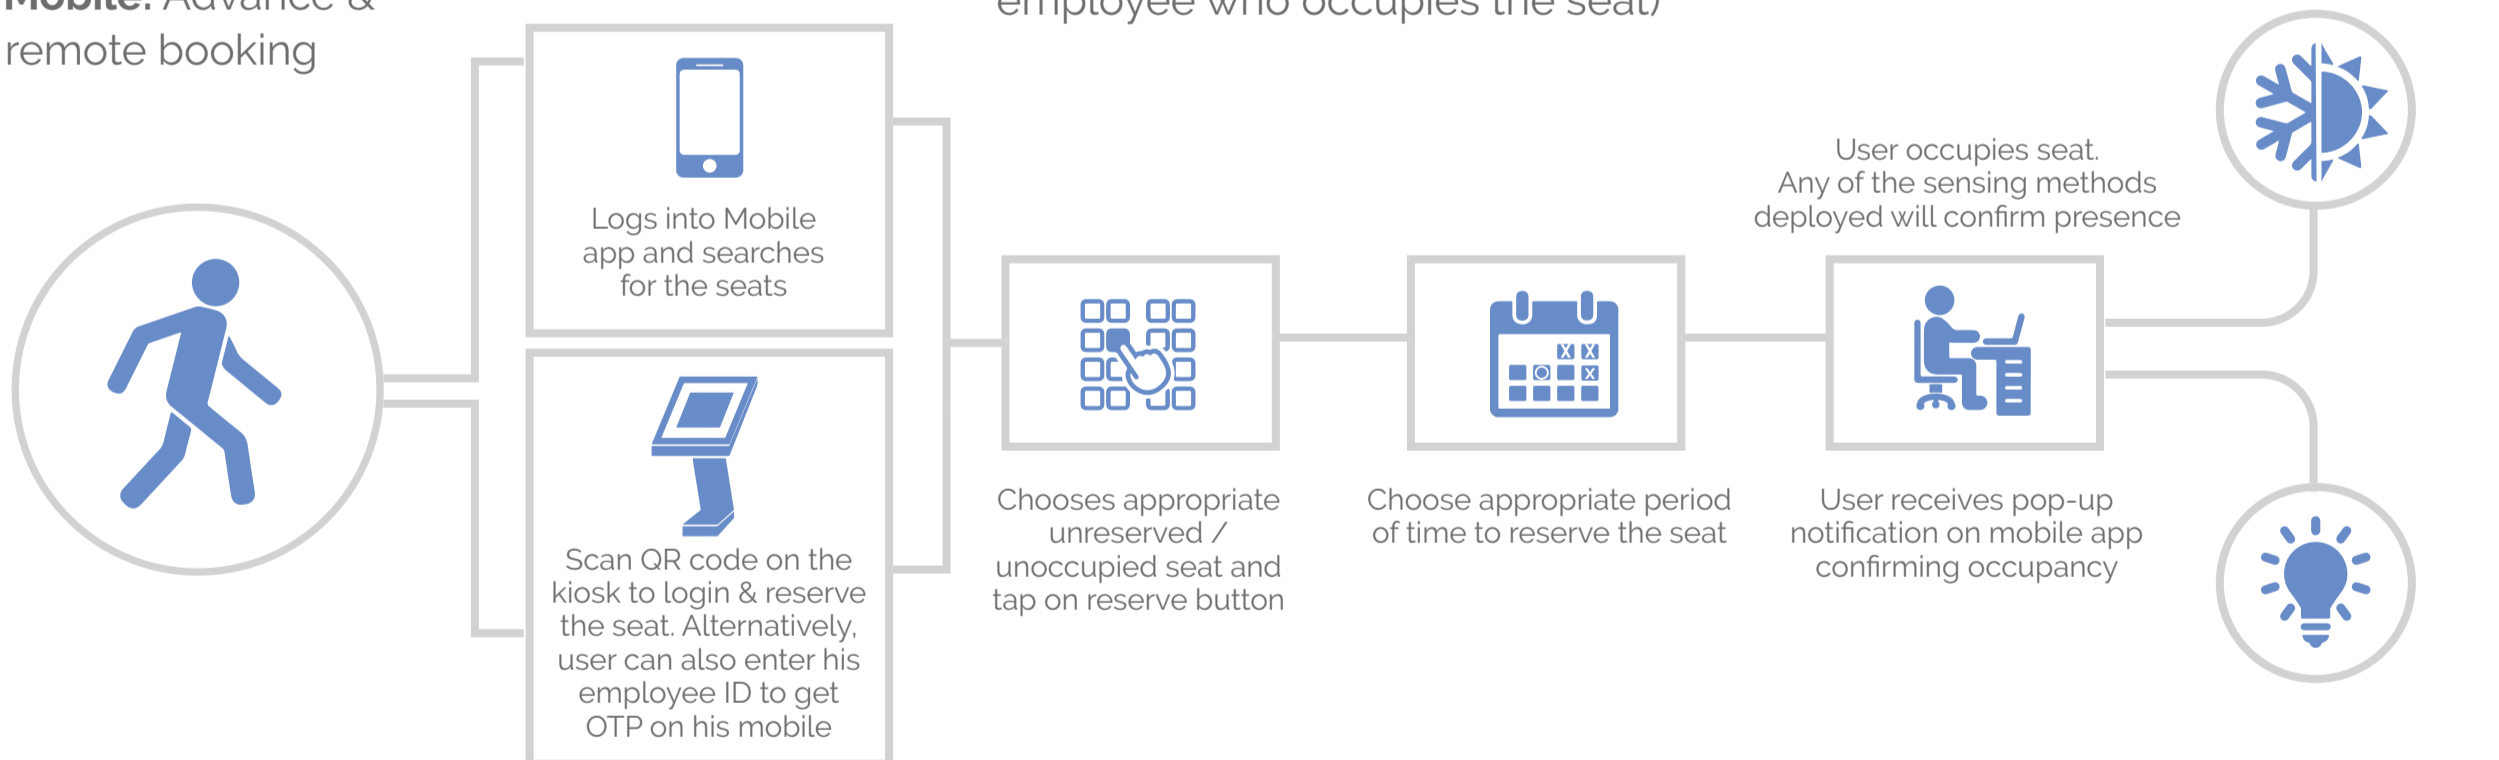

Desk Booking Workflow

Employee reserves seat through

1. **Web Portal:** Advance & remote booking
2. **Kiosk:** Instant booking
3. **Mobile:** Advance & remote booking
