

Azure Synapse Analytics Fast Start

Advance your data-driven transformation journey on a cloud-native analytics platform

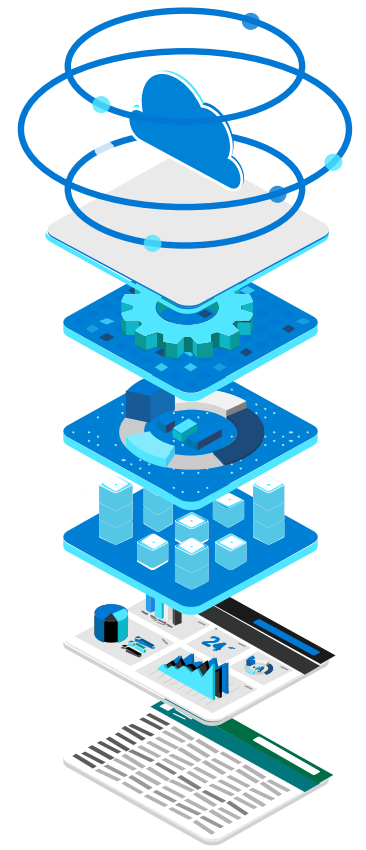

While analytics & AI is the **#1 investment** for organization, they struggle to maximize ROI due to their current legacy & siloed infrastructure.

According to a Pulse survey by Harvard Business Review:

80% struggle to become mature users of data

55% highlighted data silos and data management difficulties as roadblocks

Azure Synapse Analytics is a powerful platform that delivers the full continuum of analytics, blending big data, data warehousing, and data integration into a single cloud native service, giving you a unified experience along with limitless scale, all at a lower cost than other platforms.

➔ Up to **14 times** faster and costs **95%** less than other cloud providers

Preparing for a intelligent organization

In this 4-Week Proof of Concept, our experts will initially work with you to understand your current infrastructure and business objectives and then thoroughly demonstrate the functional and technical capabilities through use-case implementation on a custom Azure Synapse environment.

			
Assess and Plan	Fast Start POC	Visualize	Next Steps
Workshop to analyze the current infrastructure, understand business objectives and define a PoC use-case.	Design and build a customized, pilot data warehouse using the Azure Synapse platform, including setting up the data pipelines for 30 Days	Develop interactive reporting using your data in Azure Synapse for the workload(s)/use case(s) to facilitate POC understanding	Discuss future engagement post closure of PoC period

Final Deliverable	🕒 Duration: 4 Weeks	💰 Cost: \$5,000
 Fully operational Azure Synapse pilot environment for a defined use case(s) or workload(s)	 Knowledge transfer: Results, and PoC code for future reference	

	<p>Synapse has been critical in the multi-dimensional analysis of our Workplace Screening application. We have been able to successfully alert customers by zip code when incidences of COVID-19 have increased in their zip code up to 3 days early, helping reduce the impact of COVID-19 on their workplace.</p> <p><i>Aaron E., CTO, HealthCheck</i></p>
