

Intelligent Document Processor

What is Intelligent Document Processor+ (IDP+)

- IDP+ is an **extension to Accounts Payable applications**, to equip Accounts Payable team with an efficient **automated vendor invoice processing**
- IDP+ Automates the AP invoice process by leveraging **Microsoft's latest Optical Character Recognition (OCR) technology, business driven Transformation engine and seamless integration with ERP** to eliminate errors and boost efficiency

How does it Works?

01 Receive Invoices where they enter the organization

02 Extract & Transform

03 Validation & Approval

04 Post Invoices to ERP

Key Features

Advanced Data Extractions

Pre-Trained ML models for data extraction

Ability for Custom trained ML model to support Extraction for additional fields as required by business such as Tax codes, BACS detail etc.

Extended Validations

Real time data validation against ERP master records such as

- Different remittance info in Invoice against master records
- Different Payment Terms in invoice against master records

Advanced Workflow engine

Incomplete Invoice routing based on Teams pending task

Straight-Through Processing for Straight Through Enabled Vendors

Robust Transformation engine

3 Step advanced transformation engine

Business rules to manage PO matched & Non-PO matched invoice data transformation

Others

Complete Audit History for each invoice

KPI Dashboards to review User activities

Supports SSO

Payments & other info write back from ERP
