

Title: Architecture audit of existing solution - 3-week assessment

Subtitle: An Architecture Audit executed by Spyrosoft's top industry Cloud Experts will help you improve the design, threat protection, availability, and cost effectiveness of your existing and upcoming cloud solutions.

The key goal of this offering is to deliver a set of outstanding actions ready to be implemented within your Azure environments.

We are a Microsoft Azure Gold Partner offering an extensive range of cloud services: from audits to cloud migration and cloud architecture consulting. We are also the fastest growing technology company according to the Financial Times.

Discovery stage:

- Our Cloud Architects will schedule a meeting with your technical and business teams to discover your business goals and bottlenecks
- Our Cloud Architects will schedule a meeting with your technical team to understand your current Azure environments

Deliverables:

- Azure Compute resources optimisation recommendations
- Improvements in Azure Storage resources
- Scalability and performance improvements
- Monitoring setup review
- Cost optimisation actions

Following this assessment, you will gain a report with

- Automation improvements
- Bottlenecks you may encounter along with increasing load
- Architecture advice that will help you scale your business

The goal of this audit is to highlight the areas that may cause issues during traffic increases or when current architecture evolves.
