Why Microsoft Azure?

London Games Festival Case Study

Gamestream partners with Microsoft Azure to provide cutting edge cloud gaming experiences at London Games Festival

- Customer Challenges

London Games Festival is continually looking for new ways to get games into audience's hands.

The aim is to offer an exclusive preview to five highly anticipated games launching in 2022 without download as steam provides.

- Gamestream Solution

Gamestream provided its owned cloud gaming technology & integrated into Microsoft Azure to provide a cutting-edge cloud gaming experience, without latency. Microsoft Azure was selected by Gamestream for fast and scalable deployment.

- Customer Benefit

For the first time in the festival's history millions of players all over the world are able to simultaneously preview and play a free 60-minute demo for the most anticipated games without the need for a console or download.

Ubisoft Partnership

"We are happy to be working with Gamestream," "With this partnership, we keep extending our game streaming capabilities for our internal and player facing solutions." Stéphanie Perotti, VP Online Services Ubisoft

Telekom Indonesia

"Gameqoo is an on-demand gaming platform to make gaming easy and affordable for everyone, to reduce game piracy, and to support game developers and the distribution channel to millions of customers." Joddy Hernady, SVP of Media & Digital Business at Telkom Indonesia

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
