

We established our Data & AI practice in 2014. As an Azure Expert Microsoft Service Provider (MSP) we use a full stack approach, with expertise in every facet of cloud transformation. Work with our team of solutions specialists, architects and data scientists to understand and unlock the real business value of data.

Collaborate with Crayon data scientists that specialize in Data & AI solutions. Together we will work to identify business challenges that can recognize organizational advantage from advanced technology solutions. Within seven business days you will have best practice recommendations and a strategic roadmap for future state.

Our Approach

You can expect the assessment to take between three to six weeks.

Design and deliver a purpose-driven data platform supporting your business success with our proven approach:

Data Platform Assessment

We will work with you to identify your top goals and objectives. This will bring focus to the assessment results and help shape and prioritize action items on the roadmap.

Data Platform Implementation

Enable data-driven decisions and AI solution capabilities by implementing a scalable data platform with a modern technology stack.

Data Platform Management

Continuously optimize running costs and performance by implementing automated monitoring and maintenance capabilities.

Included in the assessment

Here is what you can expect and what is included with every assessment:

- We dig deep to **understand your current and future pain points** and advise you on the technologies and tools that you need to establish a future proof data platform
- We **build your data platform from start to finish** and engage with you throughout the entire process! This enables us to make sure that you get what you need and strive for excellence in service quality, customer satisfaction, and delivery efficiency.
- We make sure you **get the most out of your data platform by connecting you with our world-class team** of solution architects, data engineers, and ML engineers.

Implementation

Our Process

Our experts will guide you through a detailed, four-phased approach – from identifying your business goals to implementing specific action items, we've got you covered.

Minimize implementation risk and costs by designing a tailored and purpose-driven data platform.

Phase 1: (1-2 weeks)

- **Planning:** Help you identify your business goals and objectives
- **Data collection:** Give you a clear picture of your current data estate

Phase 2: (1-2 weeks)

- **Data analysis:** Optimize your investment with our analysis of your data and infrastructure

Phase 3: (1-2 Weeks)

- **Action:** Implement a strategic plan created for your cloud journey

We help clients optimize and innovate with software, cloud, data and AI. Our team has deep expertise, with over 100 data scientists, each averaging 10 years of experience. Our services can help with a cloud migration, innovate through Azure, and improve the user experience with Modern Work and Teams solutions, all while keeping your data secure.
