***"As many as 50% of organizations could not survive a disaster event"***  
— IDC, 2019

Think Ahead.

Everyone agrees that an ICT Continuity plan is—at the very least—*important* for their organization...

... however **ICT Continuity is a challenging puzzle**

- Plan needs to be evolving and agreed upon constantly
- In intensifying regulatory and compliance conditions
- For increasingly complex cloud deployment options
- ICT progressively growing in importance to business
- Threats and costs of disruption escalating relentlessly

As a **result**, more often than not, organizations have an **outdated or inadequate ICT continuity plan.**

**The solution** is to create a continuity plan that (a) answers your immediate needs, but also (b) includes a feedback and update process to keep the plan current at all times.

It is also critically important to engineer a solution that is flexible and powerful enough to accommodate changes.

# ICT CONTINUITY AS A MANAGED SERVICE BY PERFORMANCE TECHNOLOGIES

ON **AZURE SITE  
RECOVERY**

 **CLOUD COMPUTING  
FOR TRANSFORMATION**

## Engineering Ethos & Business Acumen

Performance Technologies is a partner that has know-how and experience in multiple domains, and can synthesize business, operational, and engineering aspects to create the right solution for *your* needs.

## Trusted Enterprise partner in Greece

We have been designing and implementing ICT continuity solutions since 1998, and are proud to be a trusted partner to enterprises of all sizes, and who operate in multiple sectors, across Greece.

## Based on world-class Cloud services

Azure offers a multitude of services for ICT disaster recovery and continuity, as well as the industry-leading elastic infrastructure to support almost any relevant need. We help you harness this power and flexibility.

## ICT Continuity solutions from Performance Technologies deliver benefits such as:

- Improved business resiliency
- Decreased "cost of risk"
- Enhanced Quality of Service
- Increases engineering efficiency
- Better compliance & governance
