Data and Al-Powered Transformation

"The world's most valuable resource is no longer oil, but data." - *The Economist*

Addo AI is a specialist consulting firm that helps businesses automate and innovate with AI by using data as a strategic asset.

Selected by Forbes magazine as one of four leading Al companies in Asia that will transform the world.

Core Services

Strategy: Data and Al

We formulate an Enterprise Data and Al strategy that comprises matching the business vision with the data architecture necessary and use case roadmap to achieve those goals and overcome challenges.

Execution: Data Platform

We build Intelligent Data Platforms that serve as the brain of the whole organisation. At their core lies a data lake and an advanced analytics and Al layer that allows business units to continually access and model data for decision making and innovation.

Value: Al Use Cases

We help reap the true value of data as a strategic asset when we apply machine learning to improve customer satisfaction, enhance innovative power, reduce operational costs, and support an organisation's expansion strategy with AI.

Experienced leadership

Dr. Ayesha Khanna (Co-Founder and CEO)

Ayesha brings over 15 years of experience in technology innovation. She worked for over a decade on Wall Street advising clients on information analytics systems. Ayesha serves on the Board of Infocomm Media Development Authority (IMDA), the Singapore government's lead agency for its smart nation, and was named one of South East Asia's groundbreaking female entrepreneurs by Forbes magazine. Ayesha has a BA in Economics from Harvard University, an MS in Operations Research from Columbia University and a PhD in Information Systems from the London School of Economics.

Dr. Faisal Kamiran(Co-Founder and President)

Faisal is a respected expert in data science and machine learning. He was awarded an internationally competitive award for innovation in machine learning research by The World Bank Group in March 2017. He has over 10 years experience on creating AI solutions to guide government and corporate entities and is in expert in identifying and removing bias in AI. He is Assistant Professor and the Director of Data Science Lab at Information Technology University (ITU) in Lahore. Faisal received his PhD in data analytics and machine learning from The Eindhoven University of Technology in the Netherlands.
