Microsoft 365 Copilot Readiness Assessment

Harness the power of Articifical Intelligence & unlock your business' full potential

If your organization wants to improve productivity by using Microsoft Copilot, Synergy Technical can help.

Our Microsoft 365 Copilot Readiness Assessment will validate your organization's readiness for Copilot as well as provide recommendations for configuration changes prior to implementation. We'll help you make sure that your data is safe, secure, and ready for your Copilot deployment.

During this facilitated workshop session, we'll review your data governance policies, assess your environmental readiness for Copilot, then provide an actionable plan for achieving Copilot readiness. We'll also show you how Copilot can benefit your organization.

Included in the assessment:

- Ensure compliance with Microsoft's Copilot readiness requirements
- Enhance your information governance to ensure Copilot only queries what each employee is authorized to see
- Boost security to prepare your environment for Copilot
- Develop a personalized roadmap for your organization
- Drive adoption with specific use case scenarios
- Provide end-user training and communication

Want to find out more?

Synergy Technical has a long history of delivering successful productivity solutions to customers. The outcome of this assessment is an actionable roadmap providing guidance, recommendations, and best practices on how to successfully implement Microsoft 365 Copilot while meeting your organization's security and compliance requirements.
