Transformation - SharePoint
Migration Factory Solution

Migration Factory Overview

Cloud Compatible Solution – Accelerates Office 365 and On Prem Migrations

Integrated Dashboards and KPIs for 360 Degree View

Configurable, Extensible with Easy Scale up/down

Two/Three Week Migration Waves

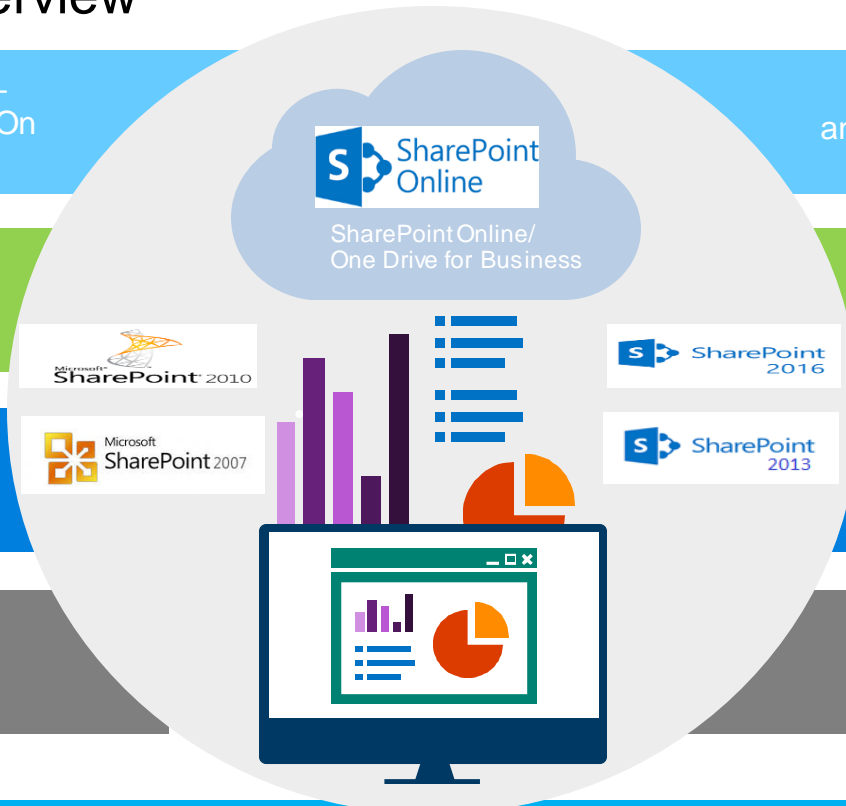

Intelligent to fully utilize VM resources and active failovers

Improved Throughput and Fidelity with Zero Throttling

Flexible, modular and configurable for any SP source and target

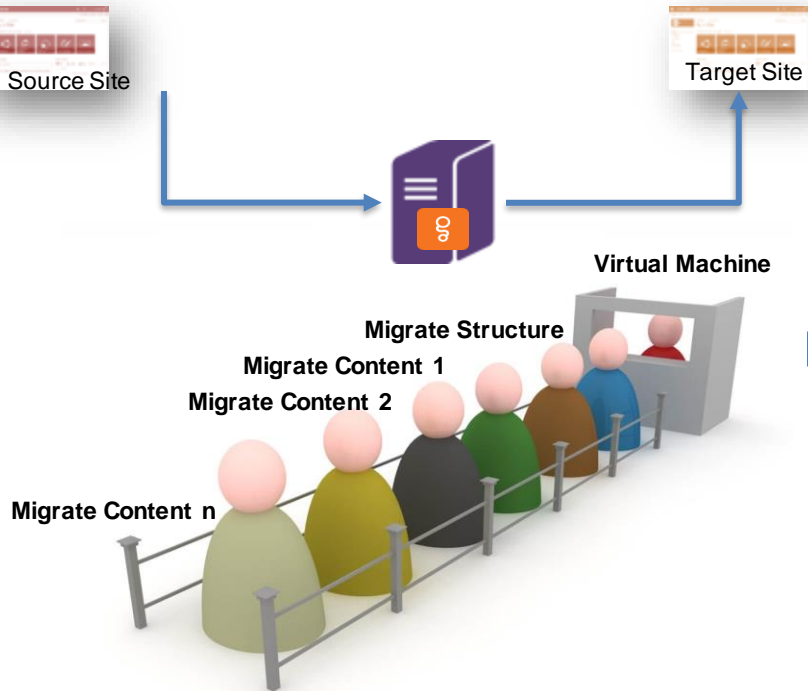

Customer Focused

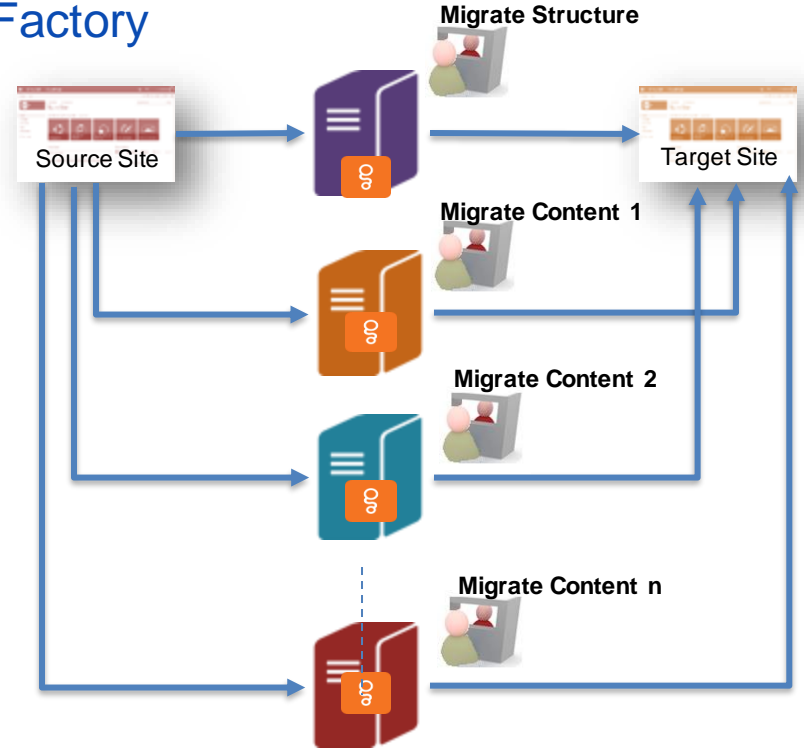

Infosys Migration Factory is a Migration Scheduler service to fully automate any version of SharePoint migrations with improved throughput and fidelity. The output beats the traditional site to site migrations by 8-10 times.

Traditional Vs Factory Approach

Traditional

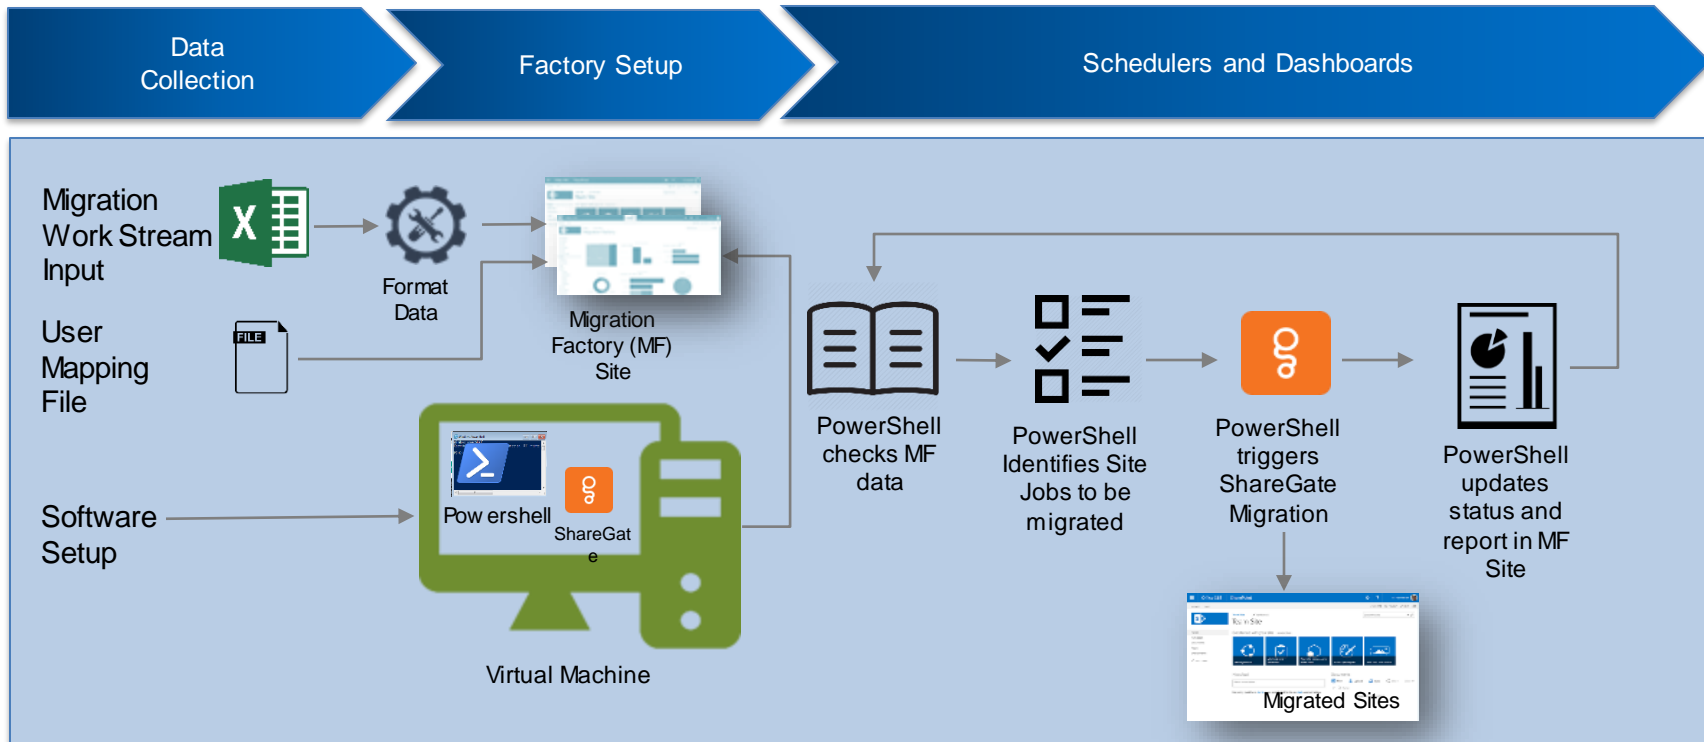

Factory

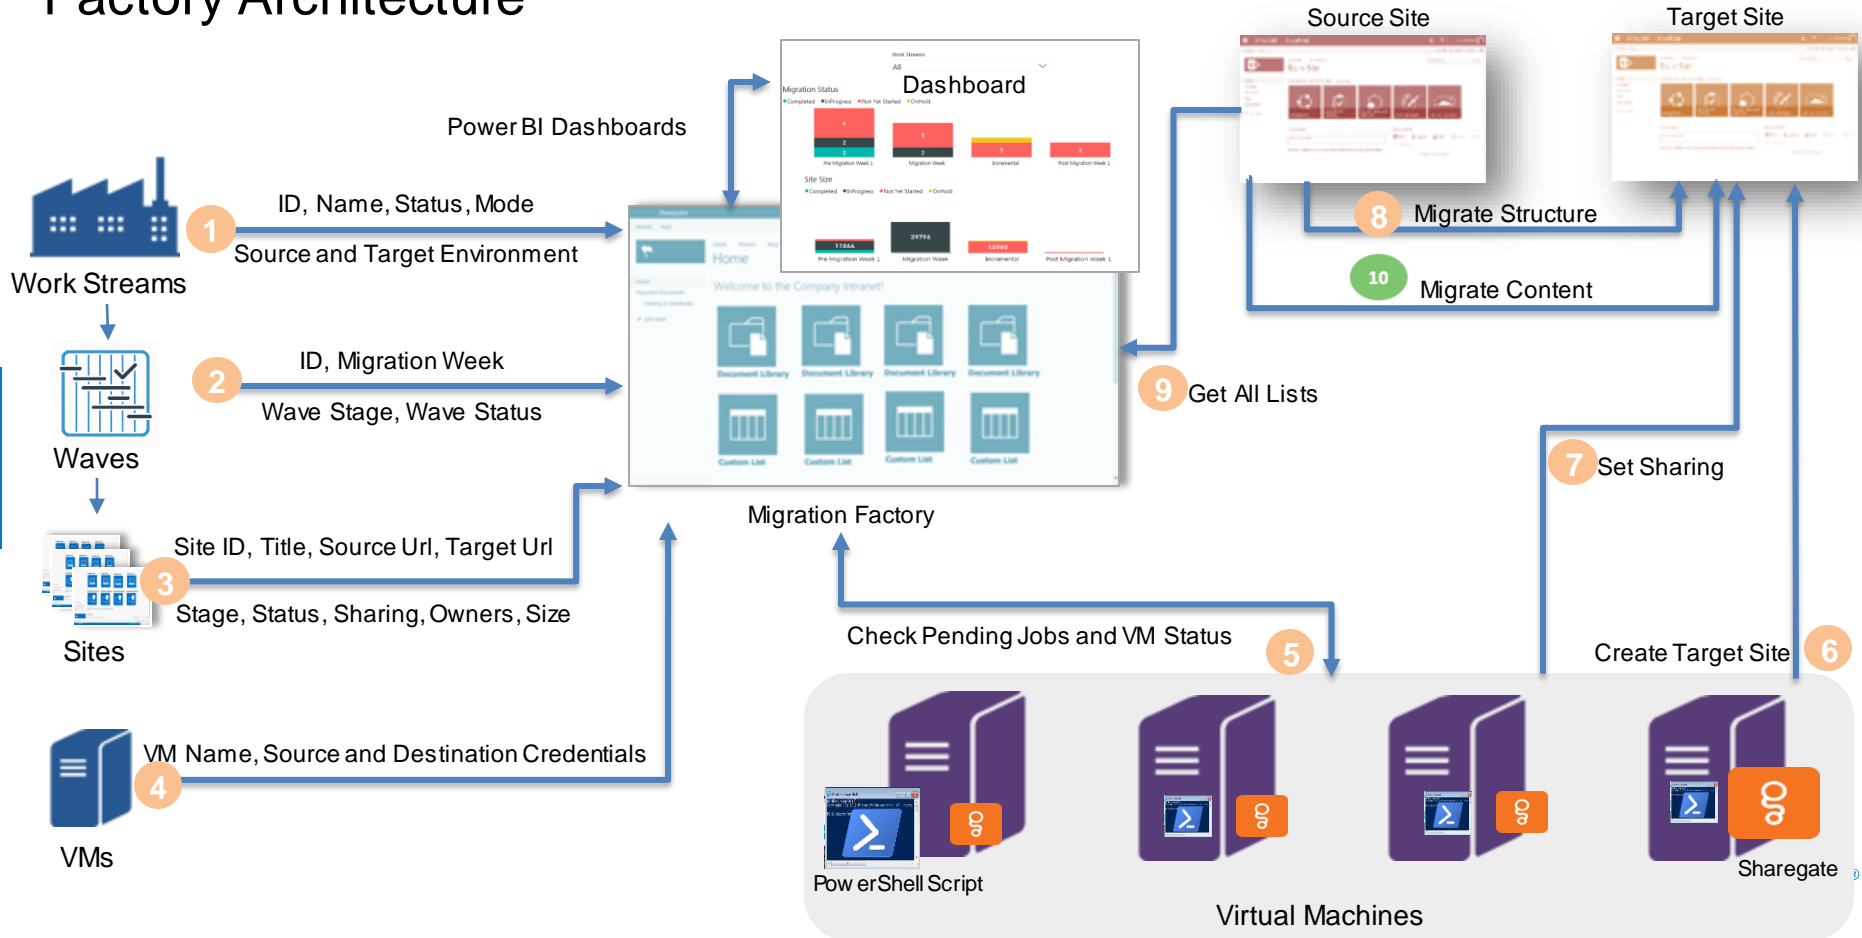

Sequential Site to Site Migrations typically queues up the migration process for all site objects and the requests will be served in First In First Out methodology

Migration Factory breaks the migration jobs into individual library based objects and the requests will be scheduled from multiple virtual machines thereby follows a parallel migration approach

Migration Process Overview

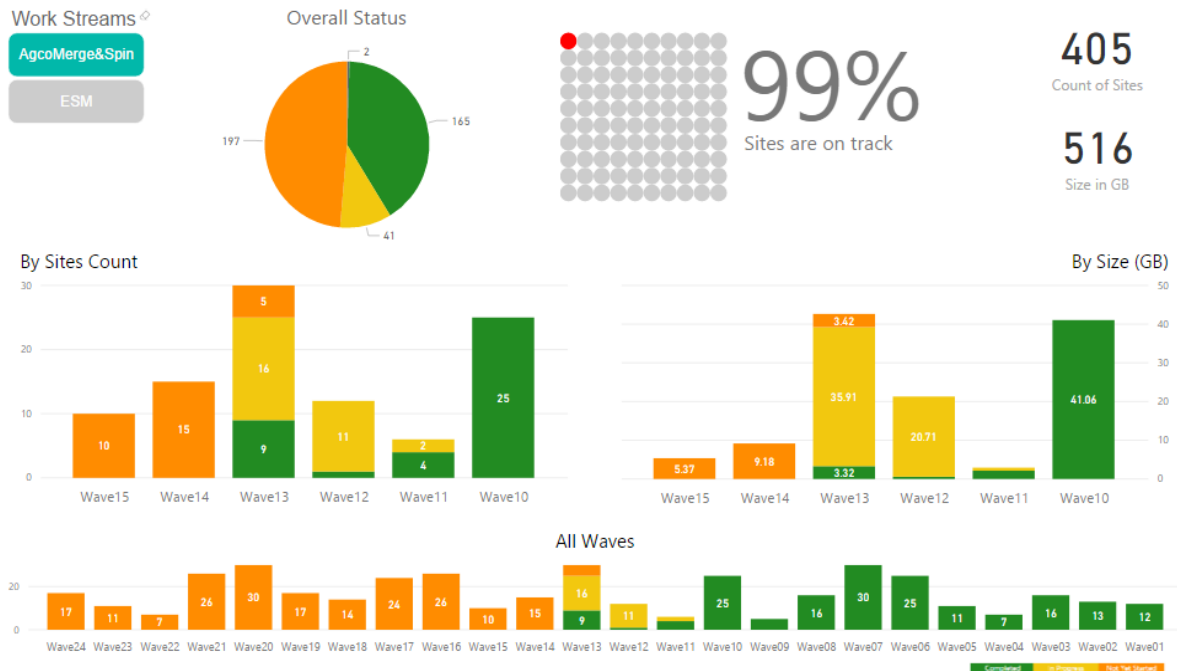

Factory Architecture

Reporting Dashboard

- A centralized place to check all migration related statuses like Jobs running, all sites and libraries migration status along with time taken for them in real-time.
- The dashboard provides an overview of complete migration program as well as provide drilldown views to find individual site and site object status.

- Power BI Dashboards for live status updates
- Provides a holistic view of running and completed migrations
- Work stream driven reports with integrated security
