

## THE PROBLEM

Contract drafting, contract writing, negotiation, document management, track changes and other contract management efforts take time and are troublesome.

## THE SOLUTION

CobbleStone introduces the MS Word for PC CobbleStone companion toolbar that helps with:

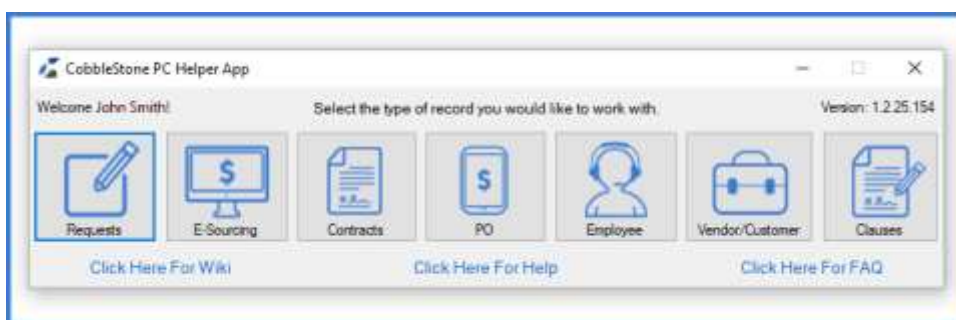

A more integrated process for contract collaboration, contract writing, and contract negotiation can be hard to come by. The “track changes” feature that comes with MS Word out of the box can help make the contract negotiation process easier with redlining.

To help to solve issues such as lost document versions and contract drafting bottlenecks, CobbleStone Software’s latest release of its celebrated contract management software – Contract Insight® 17.7.0 – offers a PC Helper App that integrates with MS Word for PC.

CobbleStone CLM Software is a powerful contract management software with artificial intelligence (AI) backed by machine learning (ML). VISDOM® systematically analyzes contracts originated by internal or external paper by transforming the documents into building blocks for improved contract oversight and proactive opportunity identification and risk mitigation.

## Getting Started with the CobbleStone PC Helper App

Before you start reaping the benefits of the user-friendly CobbleStone integration with MS Word, you must first ensure that you are logged into your CobbleStone PC Helper App and your Contract Insight core system.
