

# Mphasis Hybrid Cloud Transformation using Stack HCI and Azure ARC for secure, reliable services

## ABOUT MPHASIS:

Mphasis an annual revenue of ~\$1.4B and delivery centres across 21 countries. Mphasis delivers these services using various methodologies and approaches like X2C<sup>2</sup>, Front2Back™, Service Transformation and Self-Funded Modernization. Mphasis leverages the full spectrum of Microsoft solutions to empower organizations to become agile and resilient while lowering cost of operations.

## WHAT WE OFFER

The approach shows how Customers can leverage Mphasis Hybrid Cloud Transformation using Stack HCI and Azure ARC framework for delivering transformation services in secure and efficient manner for achieving the desired outcomes

Mphasis Hybrid Cloud Transformation using Stack HCI and Azure ARC framework is vendor neutral delivering services by using Azure solutions like ASR and Mphasis IPs/ accelerators for transforming workloads on “Any Platform, Any Provider, Any Location”

Mphasis Hybrid Cloud Transformation framework is based on 5 stages – Discovery (3 weeks with assessment), Planning, Design and Build, Migration and Hypercare. Each of these stages have clearly defined entry and exit criteria enabling the Customers to realize deliverables and benefits before moving to next stage.

Mphasis utilizes Azure native capabilities – Stack HCI, Azure Arc and experience of delivering transformation solutions across Digital, Data and End User focused services. These deliverables are supported by Azure Security services like Microsoft 365 / EMS services, Sentinel platform

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
