

Bridewell

E3 & E5 Security Capability & Commercial Assessment

Bridewell is a leading provider of security consultancy and managed services. A member of the Microsoft Intelligent Security Association and a Microsoft Gold partner, we're collaborating with Microsoft to ensure that organisations have full awareness and understanding of the benefits their security posture would inherit from upgrading their Microsoft Enterprise licensing.

Member of
Microsoft Intelligent
Security Association

The E3 & E5 Security Capability & Commercial Assessment Incorporates:

Detailed overview of your organisations current licensing position and what features are being utilised at present

Workshops identifying the art of the possible with what new products would be prudent to investigate for deployment into your environment

Third-party vendor assessment to discover if an uplift in licensing could assist feature consolidation under Microsoft toolsets

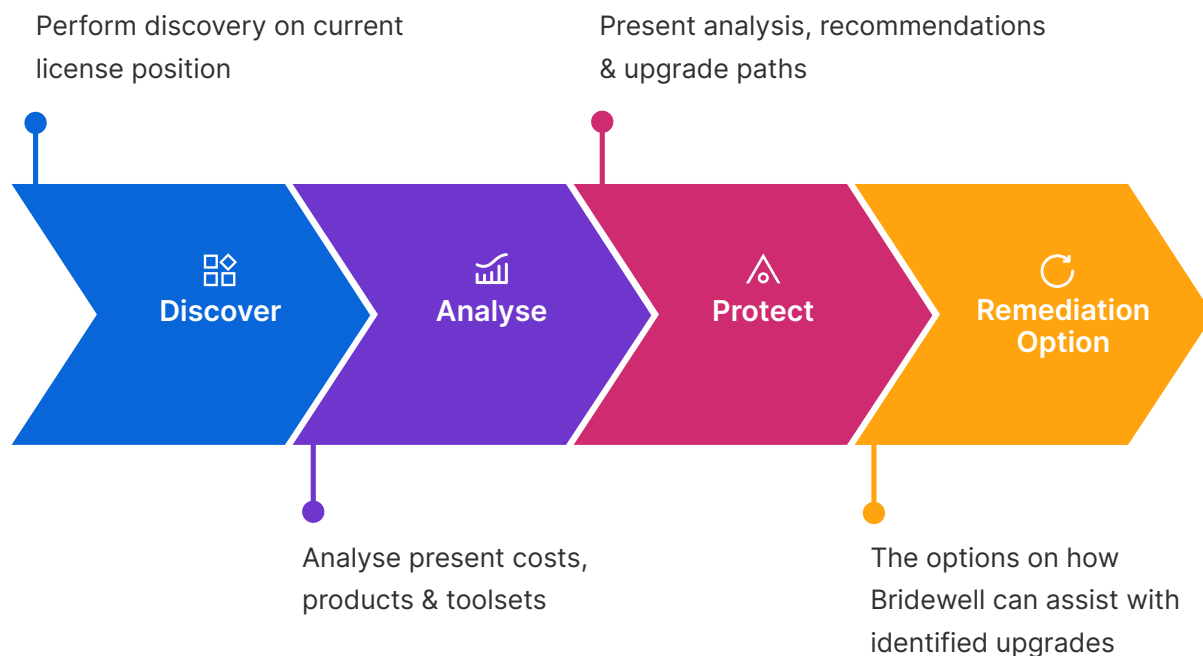

Adoption framework and implementation timeline for onboarding new security solutions with associated integration paths

Cost benefit analysis of performing the identified enterprise licensing upgrades

5 Day Process Timeline

The Benefits

The Enterprise Security Capability & Commercial Assessment will ensure your organisation is paying for and utilising the appropriate security solutions under your licensing and that strong value is being provided. This assessment will provide your organisation with a holistic overview and plan to improve the security posture of your infrastructure, end-users and customers by making use of the correct Microsoft licensing and toolsets.

About Bridewell

Trusted globally by highly-regulated and complex organisations to deliver tailored cyber security, managed security, penetration testing and data privacy services, providing protection against cyber attacks and driving continuous transformation.
