

How do you protect your cloud?

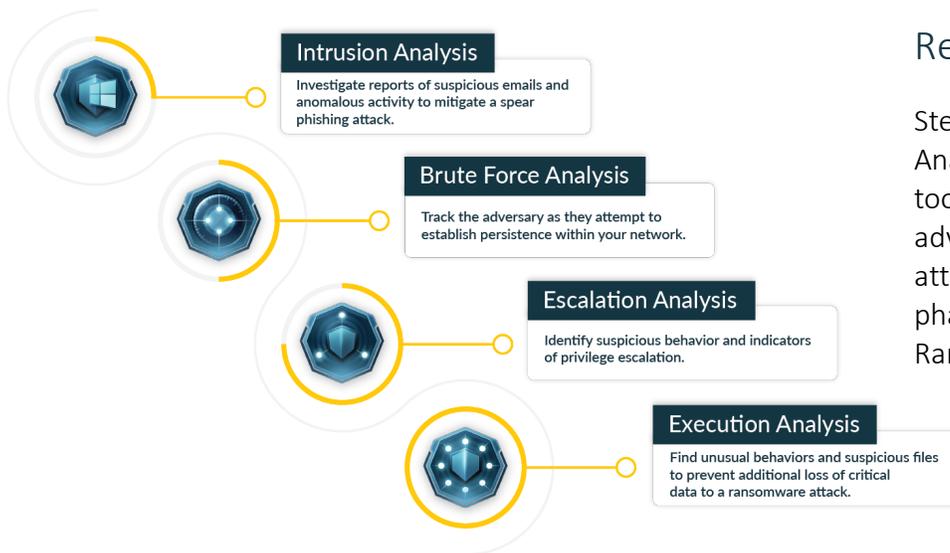

INTO THE BREACH

Brought to you by KAMIND IT and Circadence

Immersive
cyber defense
experience with
Microsoft Cloud
Security Tools

Shifts to the cloud alter security challenges. It is more important than ever to use with tools designed to support flexible, dynamic cloud environments.

This technical, hands-on experience puts you in the driver's seat to test drive Microsoft's latest security technology including Azure Sentinel, Azure Advanced Threat Protection, Office 365 Advanced Threat Protection, Microsoft Cloud App Security, and Microsoft Defender Advanced Threat Protection.

Real World Accuracy

Step into the role of a Cyber Defense Analyst and use M365 cloud security tools to investigate indicators of an advanced threat that is conducting an attack on your network across multiple phases of the kill chain in our Cyber Range
