

## THE BENEFITS

# Nordcloud Managed Azure Cloud Foundation.

Industry best practices  
**continuous improvement** and  
**rapid** implementation.

**Infrastructure as Code**,  
configuration blueprints &  
**automation**.

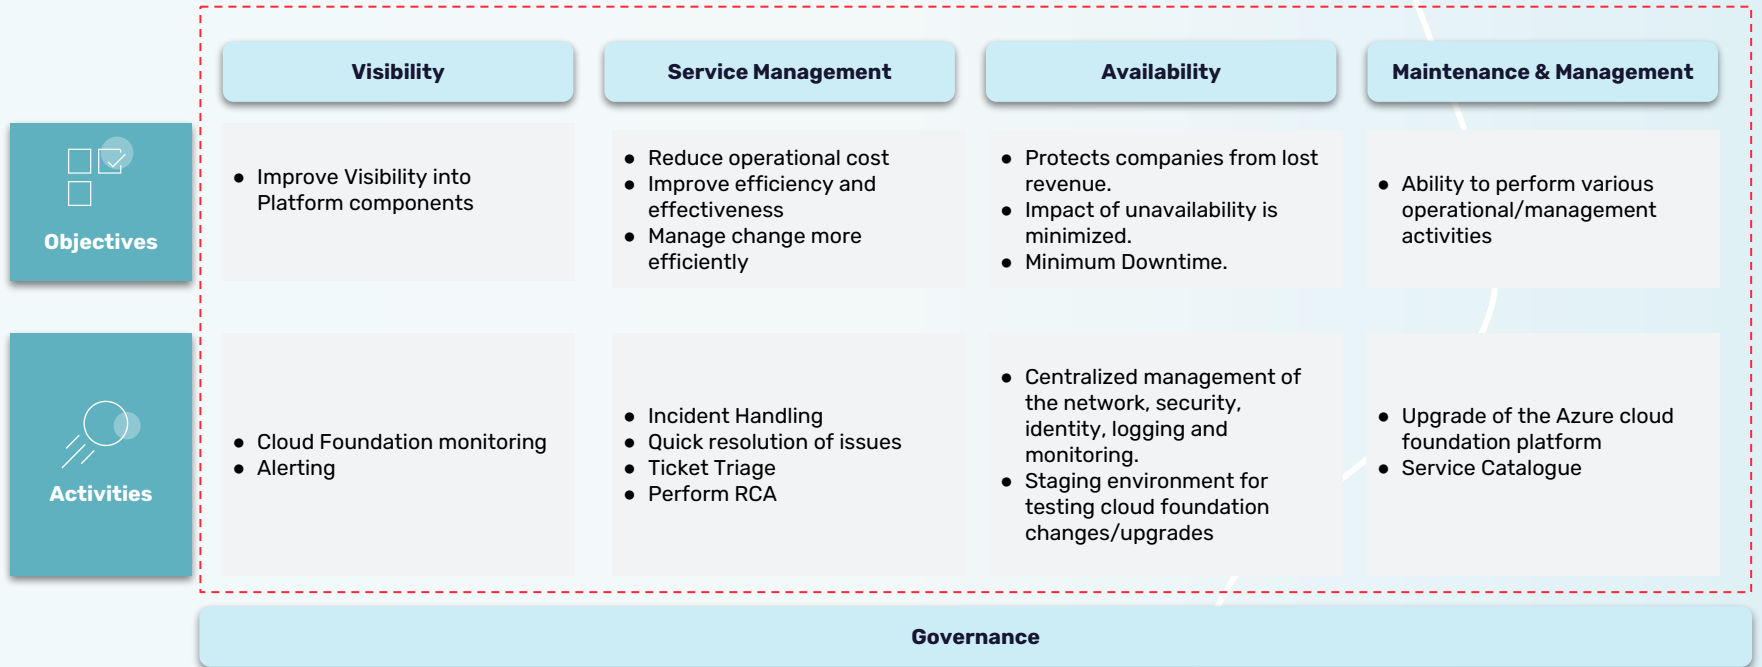

Building **customizations** on the  
back of the standard landing  
zone used as an accelerator.

**Secure** Azure cloud foundation,  
**easily accountable, managed**,  
that stays consistent when  
**scaled**.

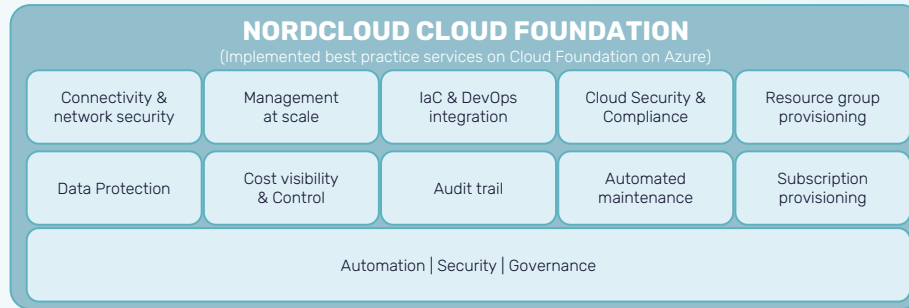

Supported and maintained by the  
**leading professionals** in the  
field.

**Maximum flexibility**, no  
multi-year contracts or minimum  
purchase requirements beyond  
the service experience.

# Managed Azure Cloud Foundation components.

# Nordcloud Managed Azure Cloud Foundation.

## Nordcloud Concierge

Service requests, incidents management, and full ITSM integration. We are at your service around the clock.

## Security Embedded

Your Managed Cloud Foundation stays always secure and compliant, no matter how your organization scales. Enables to innovate fast within safe guardrails.

## Managed Services

Monitoring of service components, alerting, access management, reporting, regular updates on the cloud foundation. No coding required. Just a service request will do.

## Automated Changes

It is all powered by a number of resources templates and you can get up and moving within a day. Maintained and continuously updated by Nordcloud.
