Nordcloud's GRC offering ensures reliable and compliant cloud services.
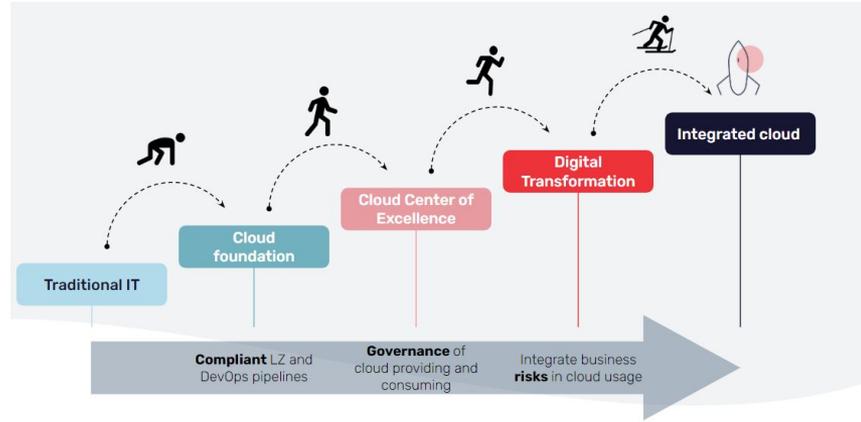

What we will deliver

Nordclouds' Governance, Risk management and Compliance services ensure reliable cloud implementations, compliant with rules and regulations while integrating governance and risk management (IT) processes.

We enable organisations and business/product owners to move to cloud, and bridge the gap between organisational requirements and technical implementations. And visa versa: use the technical cloud status to link back into compliance and risk processes.

How we will deliver

Traditional IT

Cloud foundation

Cloud Center of Excellence

Digital Transformation

Integrated cloud

Compliant LZ and DevOps pipelines

Governance of cloud providing and consuming

Integrate business **risks** in cloud usage

Value-add

1. Governance models	*2. Cloud compliance*	*3. Integrated cloud risk mgmt*	*4. GRC status reviews*	*5. Structural GRC assessment*	*6. GRC (maturity) roadmaps*
To effectively and efficiently organize cloud responsibilities and mandates, when providing and consuming cloud services.	Make and keep the cloud and cloud workloads compliant with business requirements and rules & regulations.	Addresses cloud associated risks, integrating the approach into your overall risk management processes.	Quick assessment of current governance, risk and/or compliance state pinpointing problem areas.	Comprehensive analysis of current cloud governance, risk and compliance maturity and desired state.,	Based on current situation draft a cloud GRC maturity roadmap to desired situation, aligned with cloud ambitions.
