

MICROSOFT INTUNE 2-DAYS WORKSHOP

What is Microsoft Intune 2-Days Workshop?

A Microsoft Intune 2-Days workshop deployment is an interactive session designed to help organizations effectively implement Microsoft Intune for managing and securing their devices and applications. This workshop guides participants through the process of setting up and configuring Intune while addressing specific organizational needs and requirements.

What is the purpose of Microsoft Intune 2-Days Workshop?

The "Microsoft Intune Deployment: 2-Days Workshop" is designed to help IT departments already using the Microsoft Azure ecosystem become more acquainted with Microsoft Intune's features and functionalities. Topics like deployment options, configuration, mobile device management, security, troubleshooting, and more will be covered in the session. This workshop's objective is to provide attendees with a thorough grasp of how to implement and administer Microsoft Intune in their company using Microsoft Azure.

Workshop Agenda

DAY 1

- ▶ Introduction to Microsoft Intune
- ▶ Overview of Intune features and capabilities.
- ▶ Understanding the benefits of using Intune for device and application management.
- ▶ Identifying specific use cases and objectives for the deployment.
- ▶ Assessing the current IT environment and infrastructure.
- ▶ Defining security and compliance policies and requirements.
- ▶ Identifying target devices (Windows, iOS, Android) and apps.
- ▶ Intune Setup and Configuration
- ▶ Creating and configuring an Intune tenant.
- ▶ Setting up users and groups.
- ▶ Enrolling devices (automatic and manual enrollment).

DAY 2

- ▶ **Device Management**
- ▶ Managing device profiles and configurations.
- ▶ Implementing security policies (passcodes, encryption, app protection).
- ▶ Exploring device compliance and conditional access.
- ▶ **Identity and Access Management**
- ▶ Integrating Azure Active Directory for identity management.
- ▶ Implementing multi-factor authentication (MFA) and Single Sign-On (SSO).
- ▶ Applying conditional access policies.
- ▶ **Security and Compliance**
- ▶ Configuring security baselines.
- ▶ Monitoring device and application compliance.
- ▶ Responding to security threats and incidents.
- ▶ Identifying common issues and solutions.
- ▶ Implementing best practices for Intune deployment.
- ▶ Q&A and open discussion.

Benefits of a Workshop Deployment

Hands-On Learning: Participants gain practical experience with Intune.

Tailored Solutions: The workshop addresses specific company needs.

Expert Guidance: Facilitated by Intune experts.

Deployment Roadmap: Clear plan for moving forward.
