Improve Security, License Efficiency, and the User Experience with Microsoft Entra ID Single Sign-On

About OCG's Microsoft Entra ID SSO Pilot Implementation:

This 2-week pilot implementation is designed to help organizations understand and test Microsoft Entra ID Single Sign-On (SSO) by configuring SSO for 5 applications.

Single Sign-On benefits include:
- *Manage applications from one central location*
- *Consistent SSO experience for legacy applications*
- *Streamlined user access to on-premises and custom apps*

Do you want to leverage Microsoft licenses more fully?

This Microsoft Entra ID SSO Pilot implementation will be beneficial for companies looking to take advantage of more of the capabilities included with their Microsoft 365 or Microsoft Entra licenses.

Are you paying twice for SSO capabilities?

This Pilot can also be used to demonstrate like-for-like replacement of the SSO capabilities of third-party identity solutions, which can help organizations decrease license costs and accelerate cloud application integrations.

The Microsoft Entra ID SSO Pilot will demonstrate the functionality of Microsoft Entra ID and can be conducted in a "sandbox" test environment or production tenant. The customer will select up to 5 applications from the Azure Gallery that will be used during the Pilot. The selected applications can also be configured in a "sandbox" environment. Applications that support multiple identity providers can be in production.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
