BUDDI™ - CODING.AI - AUTO MEDICAL CODING PLATFORM

CPT & ICD-10 Dual Code Ready

+

Auto Medical Coding API / Platform

CODING.AI™

- Automatic ICD-9, ICD-10, CPT, E/M medical coding platform using propriety NLP/machine learning algorithms
- Machine codes 1000+ medical charts of all 30+ specialties in less than 15 minutes at machine speed
- Full blown comprehensive medical coding enterprise workflow platform
- Role-based logins for coding managers, onsite/remote coders, auditors and provider clients
- Built-In encoder features with deep-semantic search, crosswalks, ICD-9/10/CPT code set index
- Built-in regulatory updates of medical code sets from CMS/others to avoid denials caused by non-compliance
- Propriety NLP algorithms built-in to interpret patient charts of various provider formats by BUDDI platform
- Built-In NCCI edits, MCE, OCE, MUE edits and LCD/NCD determinations to comply with coding standards Propriety
- Machine learning algorithms which exponentially improves medical coding accuracy to 95%+
- Supports both physician & facility coding for out-patient specialties.
- Supports inpatient coding with built-In DRG groupers.
- Built-In OCR feature to convert handwritten charts to electronic charts on-the-fly by BUDDI platform
- Built-in integration for 'Denial Score', to predict medical coding related claim denials and improving reimbursements
- Military grade security of PHI's with 256 Bit AES encryption.
- Built-in secure FTP uploads for bulk medical chart uploads from provider clients, partners (or) internally
- Built-in provider (client) specific logins for clients to monitor the medical coding job status in real-time
- Integrates to ALL major EMR/billing modules via HL7 & X12N protocols
- Comprehensive medical coding analytics dashboard with custom reporting

Guaranteed ROI

- ICD-10 ready & predicts ICD-10 denials
- 50%+ reduction of denials within 11 months
- 300% jump in coder productivity
- 1000+ charts machine coded under 15 minutes
- Workflow + OCR + Auto-Coder
- Auto-update of CMS coding compliances

Hosted RCM Platform

- HIPAA Compliant
- Military Grade Security
- 256 Bit AES Encryption
- Cloud Based Platform
- Zero Software Installs
- Zero Server Maintenance
- Auto Upgrades
- Unlimited Storage
- EMR Integration

Salient Features

- Industry's most Accurate integrated Auto-Coding & claim denial prediction platform with sophisticated NLP based predictive learning capability to adapt with changing payer adjudication rules and varying regulatory & coding compliances.
- Provides sophisticated easy-to-learn solution for accurate, complete and compliant coding and grouping.
- Enables Providers, RCM vendors with auto coding technologies and improved integration with EMR systems.
- Provides ICD-10 functionality today as an essential resource for all ICD-10 implementation programs
- Increases coder productivity by 300% and helps streamline operations for better ROI. HIPAA secured cloud based platform secured in active partnership with Microsoft Azure.
