

WESTERN COMPUTER TRAINING

DYNAMICS 365 BUSINESS CENTRAL REPORTING WITH POWER BI

Advanced Training Course

Are you ready to **accelerate and advance** your Power BI skills to take your performance to the next level?

Do you need to learn how to connect multiple data sources and applications, build complex data models and financials, and **secure your content**?

Western Computer has an exciting opportunity for you to reserve private training sessions with our experienced Power BI experts.

Make Power BI a competitive advantage as you go beyond the basics and learn how to transform complex data into real-time visibility and insight across your organization. These contextual training sessions provide best practices and step-by-step instructions for a variety of advanced skills.

Attendees will learn how to maximize the value of Business Central reporting with Power BI, including:

- Overview of Power BI Desktop, Power BI Mobile, Power BI Service, DAX, query tools and more
- How to utilize Power Apps and the Common Data Service to develop interactive reporting
- How to combine and connect multiple cloud and/or on-prem data sources to Power BI
- How to build and manage data models, relationships and calculations
- How to secure and control content with row-level security and auditing
- How to connect Power BI with Dynamics 365 BC, Excel, OneDrive, SharePoint, etc.
- How to create monthly financial statements in Power BI
- How to model financial forecasts in Power BI

Looking for an **introductory** Power BI training course?

Ask about our fundamentals training course for beginner to intermediate Power BI users covering how to query and extract data, create data sets for reports and dashboards, and more.
