

SITEFLOW

“ YOUR DIGITAL COMPANION ”

# 1 Benefits

SiteFlow addresses construction and maintenance companies operating on challenging sites. The software solution is made to digitize your interventions from preparation to execution.

## Unleash your productivity

More than only digitizing your processes, SiteFlow brings a new methodology to preparing and planning your operations. With SiteFlow, engineers and operators can really focus on their value added and unleash their productivity.

## Strengthen your quality processes

SiteFlow integrates the quality management requirements of international norms in place in the industry. The solution guarantees the traceability of all your operations from the office to the site.

## Build your company's Intelligence

Our work breakdown structure makes it possible to re-use technical content from one project to another, and to enrich it over time. With SiteFlow, you are building your own intelligence that capitalizes your technical knowledge and makes your operations more and more reliable.

“ Digitize your operations from preparation to execution ”

# 2

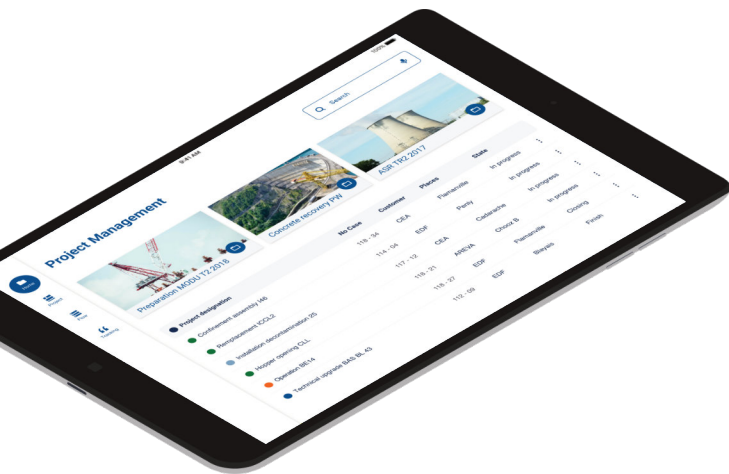

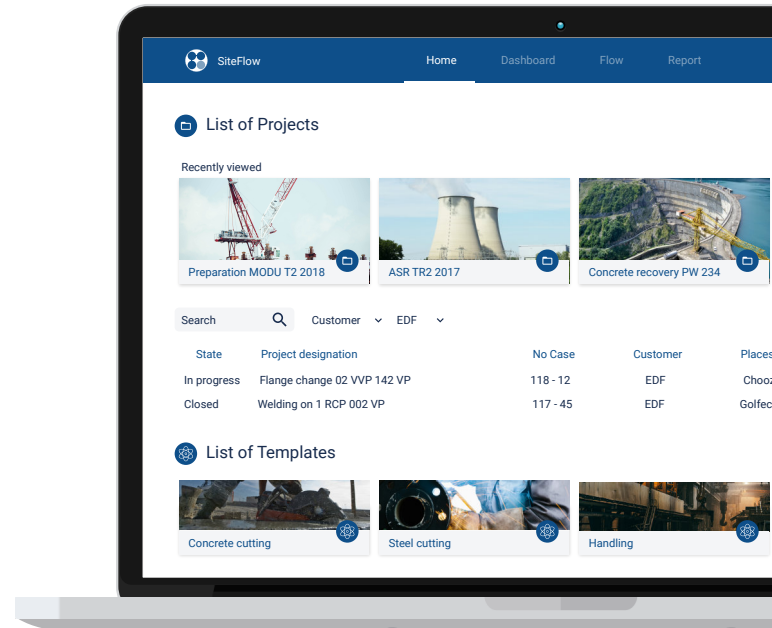

## Overview

SiteFlow re-connects the office and the site through a Web App and a Mobile App

### Web App

In the office, the collaborative platform assists project managers, engineers and technicians in preparing their interventions.

### Mobile App

On site, SiteFlow is the digital companion of site managers and operators.

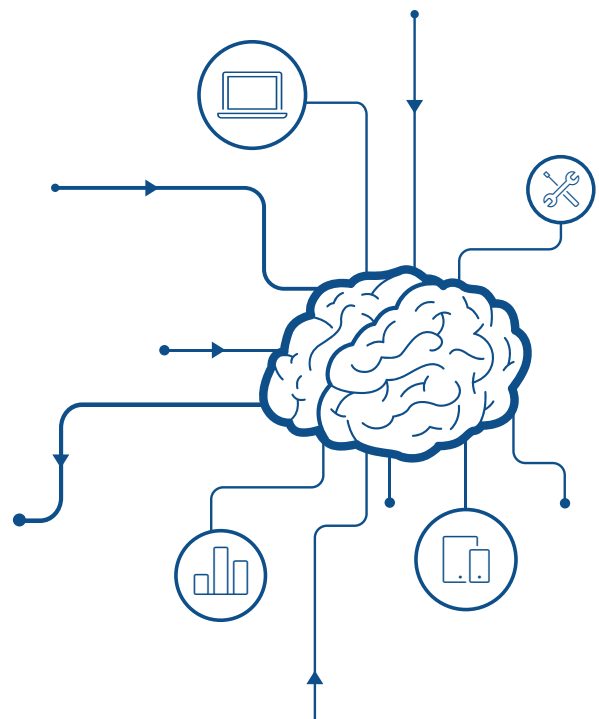

They can organize their interventions and report feedback easily to the office.

### Knowledge Base

SiteFlow centralizes your knowledge and makes your procedures and technical content re-usable from one project to another.

The users can finally focus on their value added.

# Web App

Prepare your interventions and generate all the documents you need

## The Flow

The Flow structures your projects in a series of elementary steps.

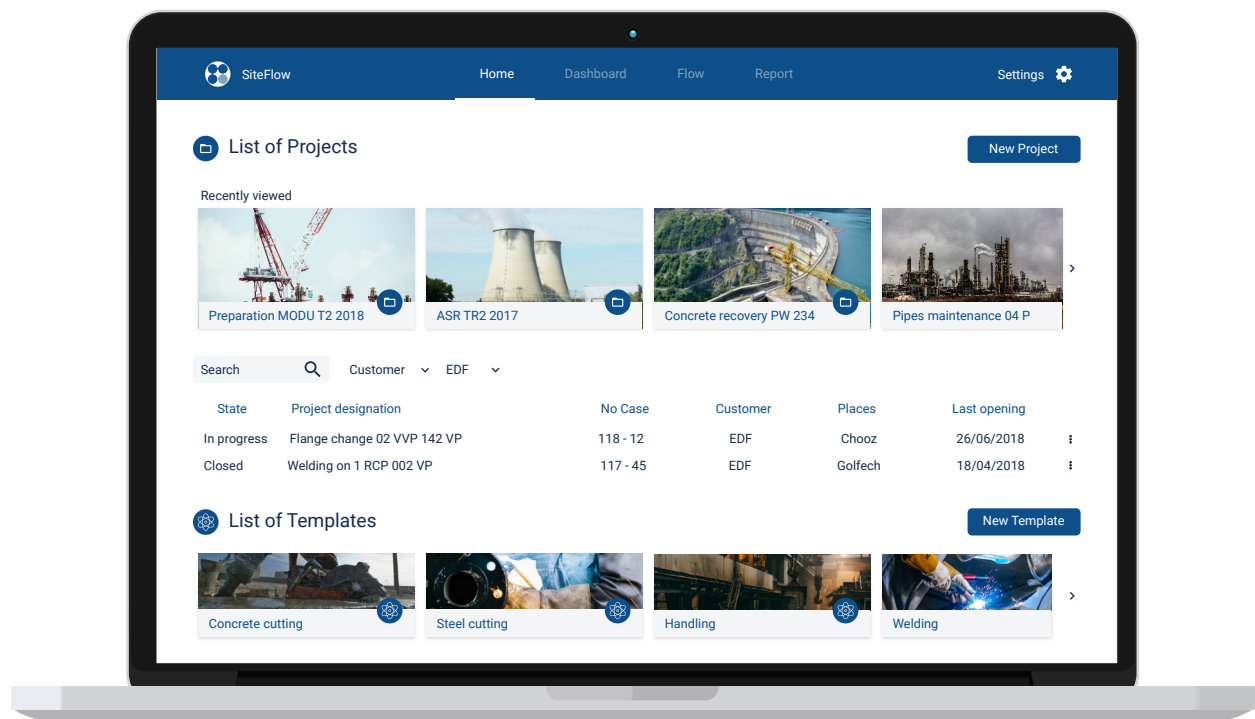

Each of them contains the details needed :

- Operational instructions
- Lists of gear and materials
- Risk analysis
- Quality checks on site

## Validation Cycle

Controllers and supervisors collaborate easily and deal with the signature workflow directly on the platform.

## Quality Reports

SiteFlow keeps track of every modification made on the projects.

Simplify your quality audits and generate your reports automatically.

## Export Mode

The solution generates all of your intervention documents in a click. It monitors every modification made internally or with the client.

# 4 Mobile App

SiteFlow is the digital companion of your operators

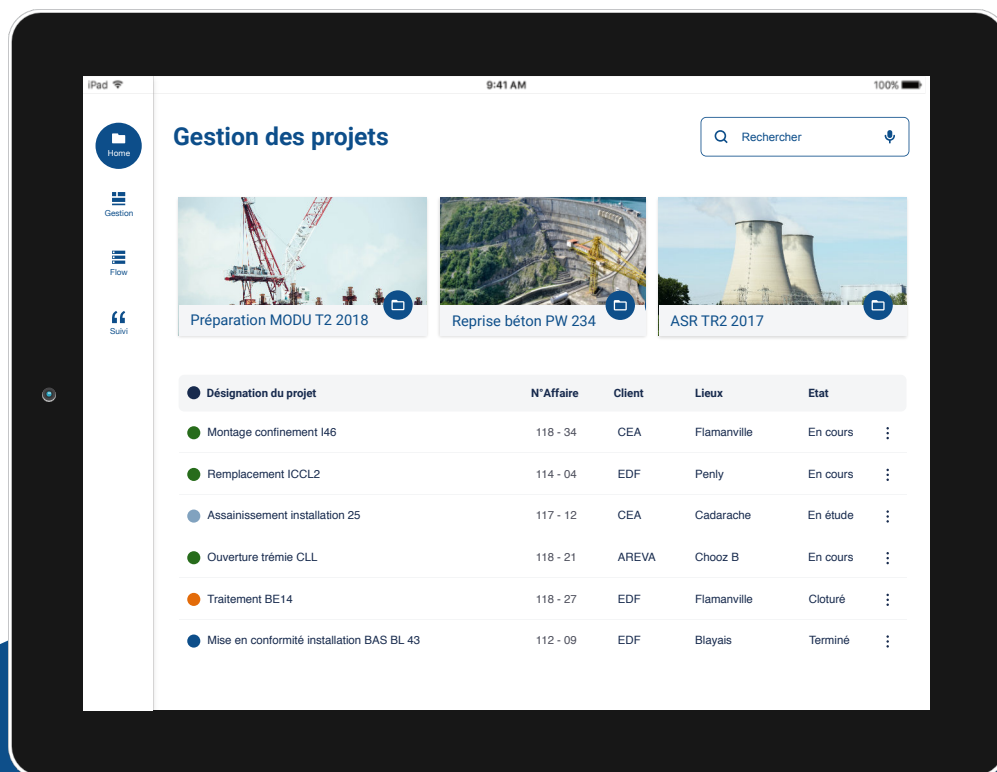

## Site Management

Lists of tasks and materials, HR bases, calendar, your supervising staff have all information they need to prepare and plan the interventions.

## Operations Follow-up

Operators have access to augmented procedures, step by step, showcasing operative instructions, safety alerts and allowing them to report feedback to the office.

# 5 Knowledge Base

Knowledge capitalization, integration of REX, continuous improvement

## Operative ranges

With SiteFlow you centralize your technical knowledge and create re-usable operative ranges. Just Focus on your value added.

## Suggestion Tool

The REX integration on past projects makes your operations more reliable over time, the software learns from mistakes made and best practices and helps you remember them.

# Build Different
