

Artificial Intelligence For Accounts _Payable

Horion IMS

Horion Invoice Management system (IMS) Is an automated method to manage your invoices. Horion IMS digitizes invoices and extracts data using Artificial Intelligence. Once the data is extracted, the approver digitally signs the invoice and system pushes the data into an ERP.

4 signs that your company needs Horion IMS

— Inefficient process

Invoice approval is a lengthy and inefficient process. Precious employee time is wasted on invoices, thus value creating activities are not done.

— Hard to get data

It is time consuming and difficult to retrieve old invoice from the archive.

— Roadblocks in approval

Time it takes to get invoice approved is lengthy if managers or directors are out of office or on holiday.

— Lack of information

Accountants constantly lack information regarding invoice and have to bombard employees with questions about it.

How Horion IMS increases productivity?

Time is saved managing invoices

More time for value-adding activities.

Huge loads are supported

Feel relaxed even with huge invoice loads.

Fast deployment

From signing a contract to using the system in less than a month*.

*If there are no development solutions required

Automated repetitive tasks

Leave manual, repetitive tasks to the system.

Work from out-of-office

Easily approve invoice while not being physically present in the office.

Microsoft infrastructure is used

System stability is guaranteed by the use of Microsoft infrastructure.

One button

Approve invoices with a single click of a button.

Easy to use

No lengthy trainings are required. Invoices can be approved using the email.

Artificial intelligence

Your personal assistant for managing invoices.

How AI helps optimize processes?

In a simple four-step process

- **Identifies and digitizes**

Invoice from inboxes across your company.

- **Translates**

Invoices in any format into uniform dataset.

- **Automates**

The invoice approval process with customizable rules and a centralized system.

- **Pushes**

Approved invoices into the accounting or ERP software of your choice - Xero, NetSuite, Microsoft Dynamics NAV and more.

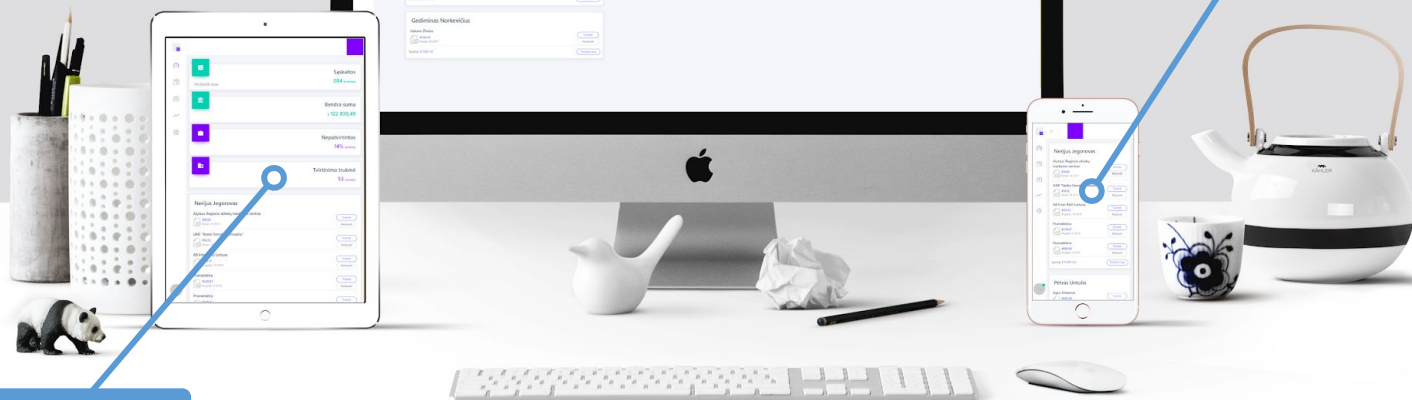

Horion IMS

Transparency

Mobility

Convenience

Compatibility with Microsoft products

There's no need to learn a fancy new system. From your ERP to your inbox, Horion IMS bridges the gap. Seamless integration with Microsoft enterprise products ensures the highest level of **stability** and **corporate security**. Works with Microsoft SharePoint, Dynamics NAV, Outlook, Flow, Azure, Office 365.

Accelerate your invoice cycle time and save yourself a headache. Only with Horion IMS.
