

Solution Overview

eWAY Asset Management

A comprehensive turnkey solution that enables centralized asset tracking, mobile transactions and BI based analytics.

Manage your Assets.

Not your worries.

eWAY Asset Management

Our system not only enables real time visibility of assets at an enterprise level but also truly enables our clients to get better reporting on asset assignment, movement and financial status of all assets throughout the organization.

Our simple yet comprehensive asset tracking system works on PCs, Android based enterprise mobile computers as well as smartphones and tablets. We offer a turnkey solution that includes software, integration, readers, tags for various assets, tag printers & programmers as well as implementation services. Our system enables live time tracking of assets through our BI based dashboards customized to your operational requirements. We offer integrations with ERPs and financial systems as well as the tools to generate simple yet insightful reports.

Asset history that can be associated with each asset throughout its lifecycle that includes:

- Asset allocation & signatures for accountability
- Acquisitions, disposals, transfers & returns
- Status/condition monitoring with pictures
- Attachments such as pictures & user manuals
- Purchase orders, invoices, letters, emails, etc.

We offer a variety of asset tags to enable tracking of assets such as equipment - indoor, outdoor & healthcare, IT assets, office furniture, fast moving/retail assets, mobile assets, etc.
