# LEARNING FOR EVERYONE

**Create video content to keep up with your digital classroom**

**The demands of digital learning are new for many of us. But the needs of our students are still the priority.**

Squigl enables educators and students to think beyond text. It allows the content creator to express ideas with voice and animated images to convey information.

Approximately 65% of people are visual learners, and another 30% are auditory learners.
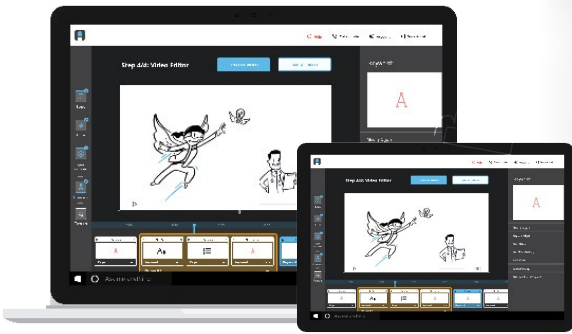

Squigl video content works with 95% of student learning styles which boosts student understanding.

Bring Squigl videos into your classroom and watch how students engage when they see content that was created with their learning style in mind.
