

Business Central – Manufacturing Assessment

A 1-hour remote assessment where we help you determine if Dynamics 365 Business Central is right for your manufacturing organization.

This free assessment is carried out through an interactive screen sharing session where we discuss your organizational needs for an ERP system.

Naviona is a Microsoft partner with a long history of implementing Dynamics 365 Business Central (formerly known as Dynamics NAV) in manufacturing environments.

The assessment will be led by one of our advisory level consultants with more than 15 years' experience in manufacturing implementations.

Agenda

- Identify Your Overall Processes*
- Analyze Organizational Goals and Objectives*
- Determine Manufacturing Requirements*

Topics

- Type of Manufacturing Processes*
- Plants and Facilities*
- Products and Their Structures*
- Type of Operations*
- Manufacturing Resource Planning*
- Supply Chain Requirements*
- Current Systems*

Deliverables

- Business Central Functional Recommendations*
- How to Best Approach an Implementation for Your Organization*
- Recommended Extensions to Support Your Requirements*

After completing the 1-hour assessment you will have an understand of the main capabilities of Dynamics 365 Business Central and if it will cover your manufacturing needs.
