

KSA's Leading Digital Transformation Enabler

Who Are We?

Over 20 years ago, NourNet started as one of the first Internet Service Providers (ISP) in the region. We've witnessed the growth and development of digitization in Saudi Arabia from the start. This allowed us to transform from an ISP to KSA's Leading Digital Transformation Enabler.

Mission

To empower every business in the Kingdom with robust digital services to help accelerate their Digital Transformation journey to meet Vision 2030 goals.

Vision

To be the leading and trusted Digital Innovation and Transformation partner in the region.

Our Journey

1998 - 2008

- Launched ISP operations
- Launched E-VPN services
- Won Bayanat (Data Network) license
- Setup Nour Global
- Setup 1st Data Center in Riyadh
- 20 – 80 employees
- Over 500 customers
- Over 10 partners

2013 - 2018

- Launched Managed IT Services
- Launched Cloud Security Services
- Launched Tier-3 Data Center
- Launched SAP HEC & Oracle PCA based Cloud
- 120 – 300 employees
- Over 1500 customers
- Over 35 partners

2009 - 2013

- Launched Managed Internet Services
- Setup 2nd Data Center in Dammam
- Launched Cloud Infrastructure
- Launched Internet Security Services
- 80 - 120 employees
- Over 1000 customers
- Over 20 partners

2019 - Present

- Launched Managed SD-WAN
- Launched Managed SOC
- Launched Managed NOC
- Launched Security 360
- 300 – 450 employees
- Over 2000 customers
- Over 50 partners

NourNet Today!

KSA's Leading Digital Transformation Enabler

Having started as a corporate Internet Service Provider (ISP) in 1998, NourNet has today become KSA's Leading Digital Transformation Enabler

Over 2,000 Corporate Customers

- 3 of the top 5 banks
- 15 of top 20 insurance
- over 50% retailers
- 800+ SMB customers
- Growing number of government organizations

Strong Partnerships

Strong expertise on multiple cloud platforms

Well-rounded Services

Portfolio of converged ICT services backed by 1st class support

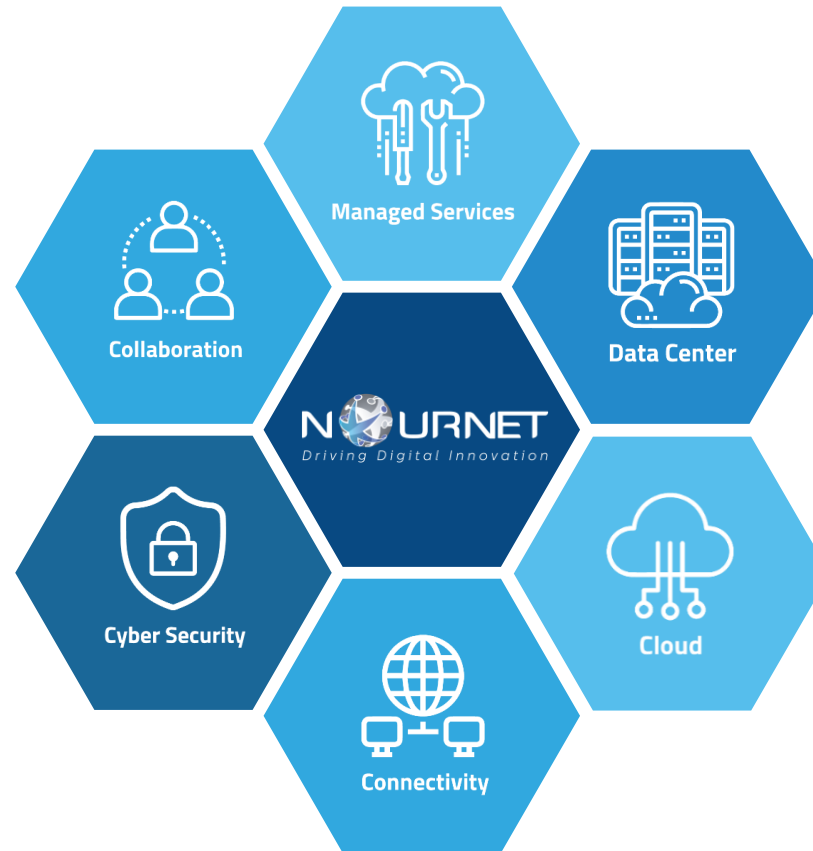

Carrier-Neutral Data Center

4,500 m2, tier-3, houses a host of public & private sector customers

Well-Rounded Services

We are very proud to have hundreds of engineers and experts serving more than 2,000 clients across 10 industries with:

- 1 Managed Services**
let us take over your routine system maintenance tasks and upgrades
- 2 Data Center**
Saudi Arabia's first carrier-neutral triple-tier data center
- 3 Cloud**
We have all the best cloud services under one roof

Connectivity
KSA's fastest, most extensive, and highly redundant IP network

Cyber Security
DDoS mitigation, email security, WAF, SOCaaS, endpoint Security, and more

Collaboration
Streamline your work and survive the digital revolution

Managed Services

Managed Services

Don't let your IT team spend 80% of their time to fix maintenance problems and upgrade outdated applications. Adopt professional managed services that activate automatic upgrades for your system, protect your data, and resolve downtime issues with ease.

NourNet Managed Services

Infrastructure

- Managed Servers Support
- Managed Storage
- Managed Backup
- Managed Database
- Managed Exchange
- SAP Basis Support
- Azure Infrastructure Management
- Infrastructure Monitoring and Management
- IT Service Management (ITSM)
- Resource Augmentation

Network

- Managed NOC
- Managed LAN (Routing, Switching)
- Managed WAN
- Managed Wi-Fi
- Managed Voice
- Managed VPN

Cloud

- Managed Public Cloud
- Managed Private Cloud
- Managed IaaS
- Managed PaaS
- Managed DRaaS
- Managed BaaS
- Managed Storage as a Service

Security

- Managed SOC
- Managed DDoS
- Managed NGFW
- Managed Web Security
- Managed Email Security
- Managed FWaaS
- Managed IPS
- Managed IDS
- Managed WAF
- Managed PAM
- Managed MFA

Collaboration

- Managed IP Telephony
- Managed Audio Call Conferencing
- Managed Video Conferencing
- Managed Digital Events

Data Center

NourNet Data Centers

- 3 strategically located data centers providing secure, redundant access to data stored within KSA.
- Our triple-tier data center is the first carrier-neutral data center in Saudi Arabia. Located north of Riyadh, this 4,500 m2 data center hosts thousands of public & private sector clients and has the capacity of 450 racks.
- This robust infrastructure makes it one of the most scalable, reliable, and adaptable data centers in Saudi Arabia.

Tier-3 Data Center

- State-of-The-Art Facility
- Carrier Neutral
- Hosting & Co-Location
- Business Continuity
- Hot Seats
- Remote Hands
- Transit Port

Why NourNet Data Center Services?

- ✓ Secure access to applications, from any location, over any network for all authorized persons
- ✓ Data center backhauling by fiber from Multiple Telcos
- ✓ Flexible and customized services offering
- ✓ Business continuity workspaces
- ✓ In-Kingdom setup, Saudi company

Cloud

NourNet Cloud Services

Saudi Domain

Select a Saudi domain name that reflects your brand and makes you stand out on the Internet.

DNS Hosting

DNS service with the fastest response time, unparalleled redundancy, and advanced security.

WaaS

Secure web hosting services with flexible packages and 99.9% uptime commitment.

EaaS

The most reliable email service in KSA that is compliant with NCA and SAMA regulations.

IaaS

Access top-tier virtual servers, storage facilities and networking capabilities to run your business operations with ease.

PaaS

Connect to our robust and native cloud platform to test, develop and deploy your business applications seamlessly.

NourNet Cloud Services

BaaS

NourNet cloud backup as a service hosted in NourNet public cloud helps protect your important data and applications from harm.

DRaaS

Protect your data and ensure business continuity during disasters with NourNet Disaster Recovery as a Service.

FWaaS

Add extra advanced layer of security, including access controls such as URL filtering, Advanced Threat Prevention, IPS and DNS Security.

LBaaS

NourNet LBaaS offers the scalability, feature depth and security required to enable resilient delivery of a wide range of applications.

WAFaaS

Detect fraudulent interactions and intercept all HTTPS requests before they reach to your web application.

CaaS

Build your Hosted Private Cloud with our next-generation dedicated servers based on HCI model.

Microsoft Cloud Services

NourNet is a tier-1 Microsoft Cloud Solution Partner, it offers managed hosting services on Azure, helping customers in migration, integration and support.

Office 365

Microsoft 365

Microsoft Azure

Microsoft Exchange

Oracle Cloud Services

Networking

Get access to virtual cloud networks, Fast Connect, Load-balancing as well as VPNs and DNS.

Storage

Install and expand your operations by Accessing block volumes and object storage.

Computing

You can use virtual machines, Windows, Linux VM, and Container Cloud Services.

Database

The Oracle Database Cloud Services also include SQL servers on VM, DB2, MongoDB, Oracle on VM, and PostgreSQL.

ORACLE®

AWS Cloud Services

Whether you're looking for compute power, database storage, content delivery, or other functionality, NourNet helps you migrate to AWS cloud to build sophisticated applications with increased flexibility, scalability and reliability.

Connectivity

Connectivity Services

Get high-speed, stable and secure connectivity to keep every platform in your business connected with NourNet Connectivity Services.

Internet

Remote Access
VPN

Direct Connect

IP VPN

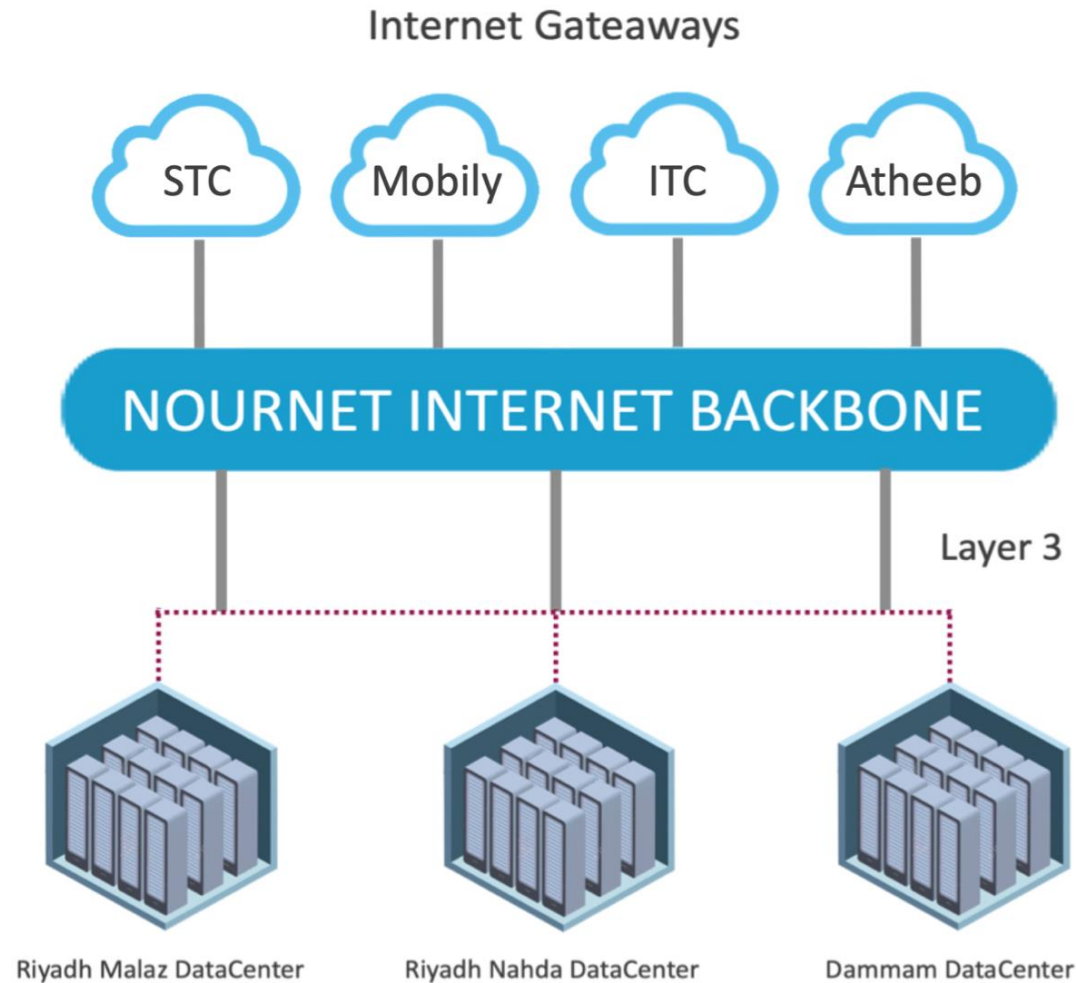

SD-WAN

Express Route

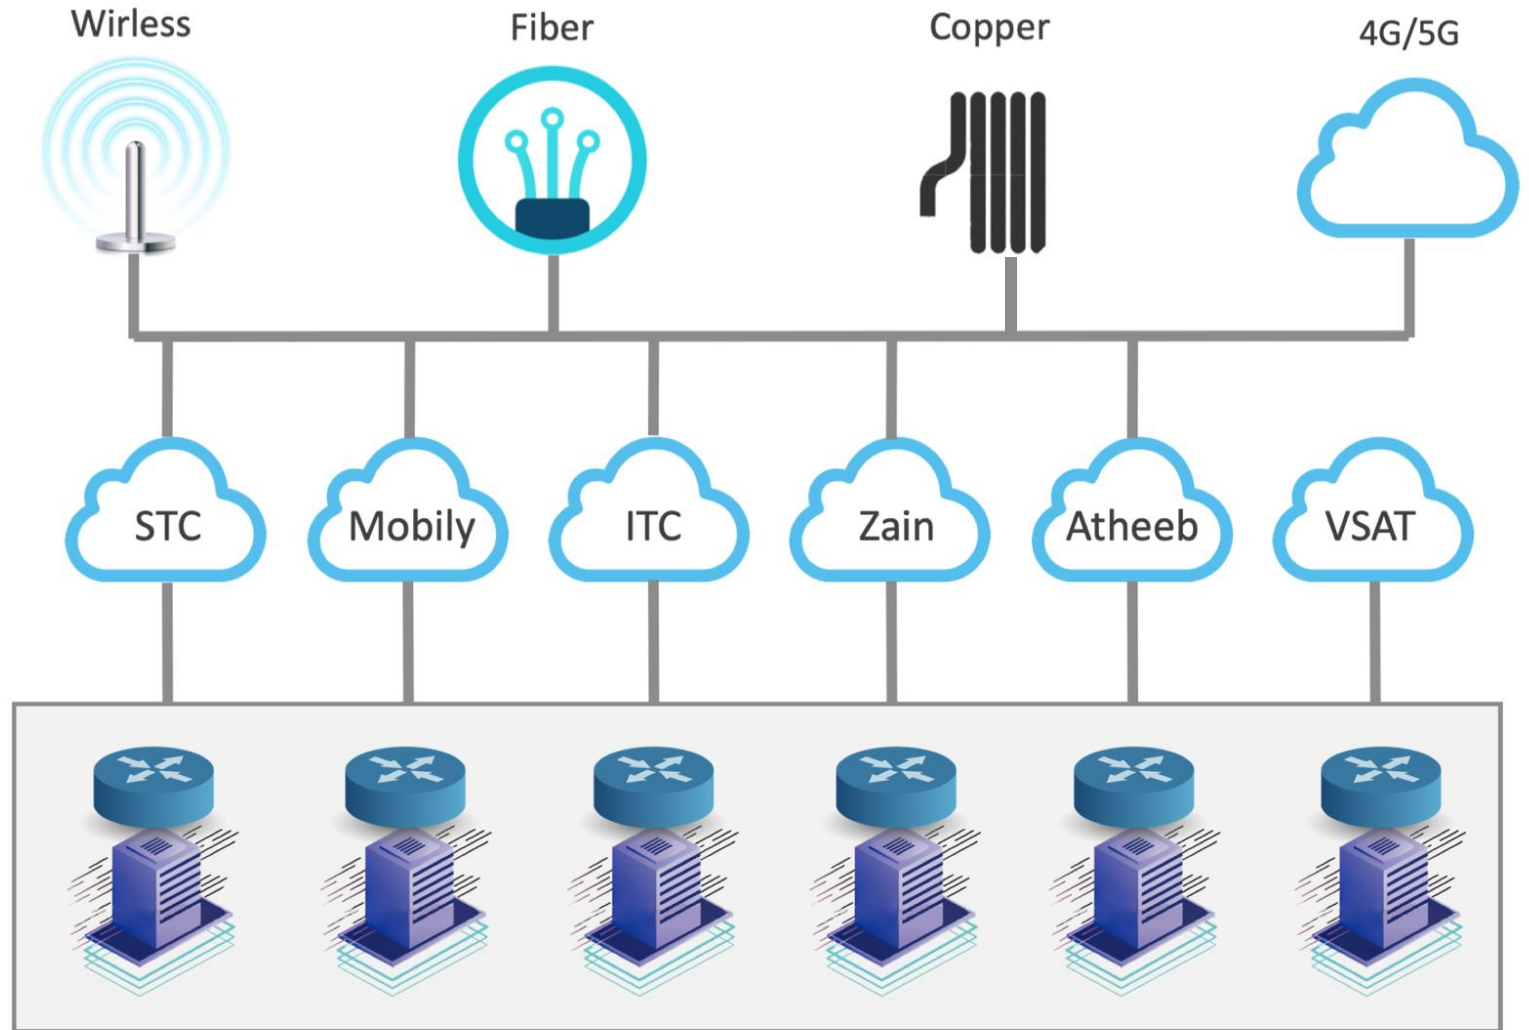

Redundant Internet Gateways

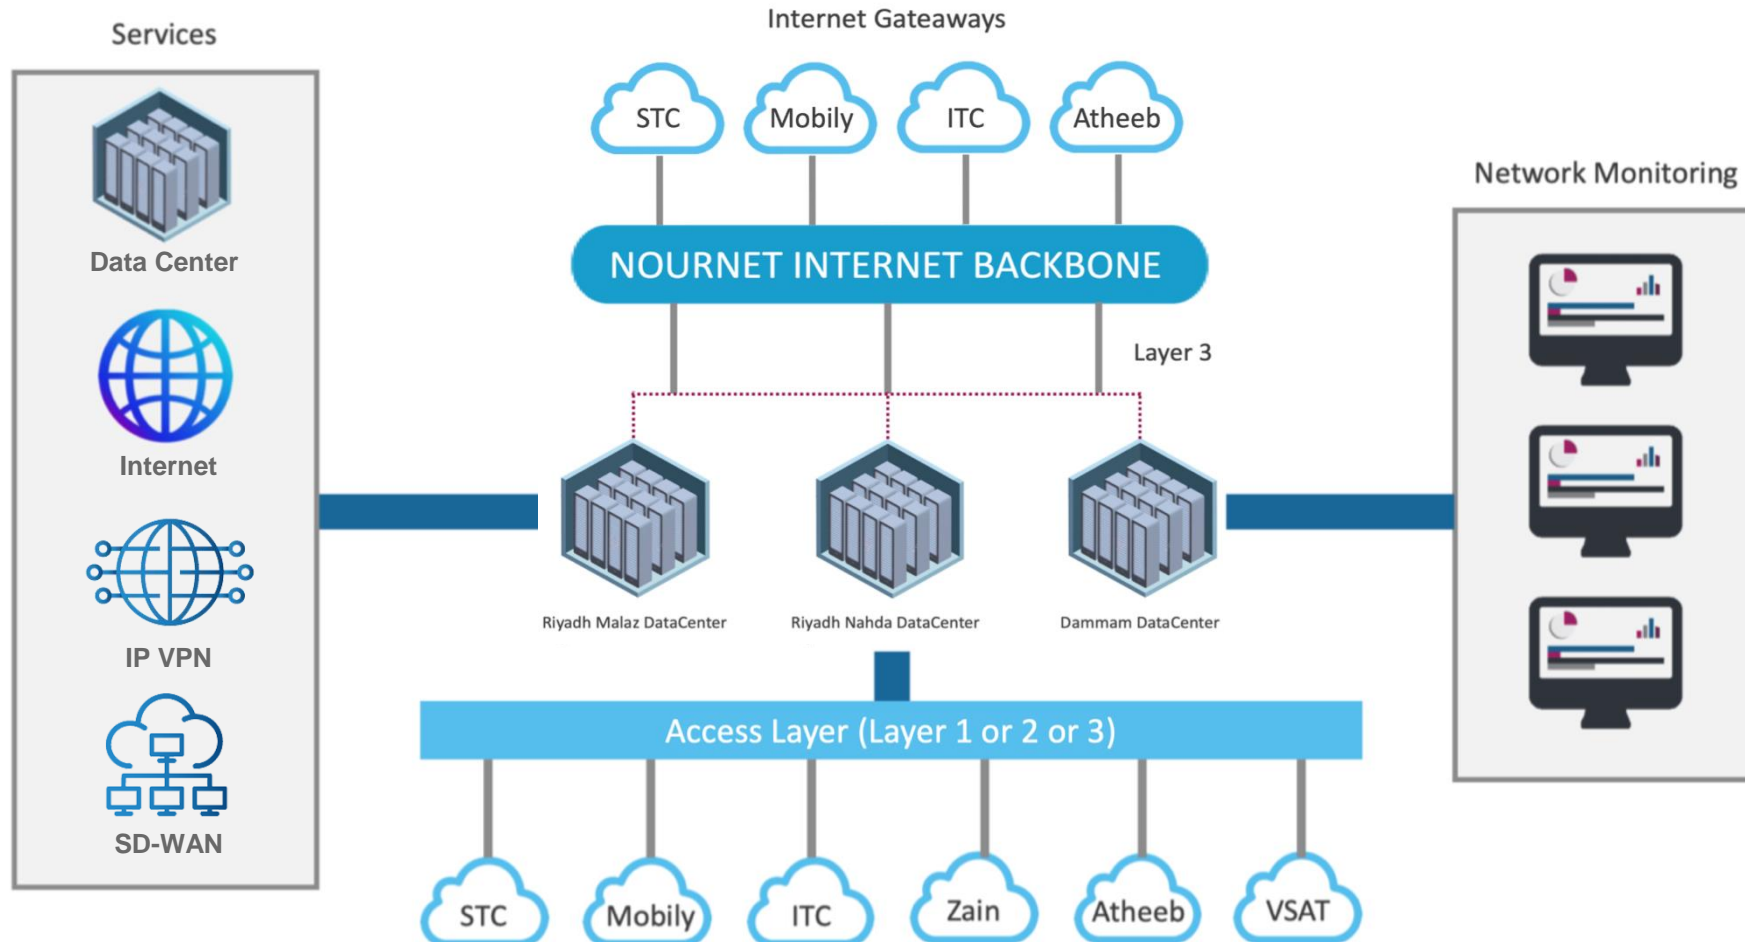

More last mile media than any other provider in Saudi Arabia

The Big Picture

Cyber Security

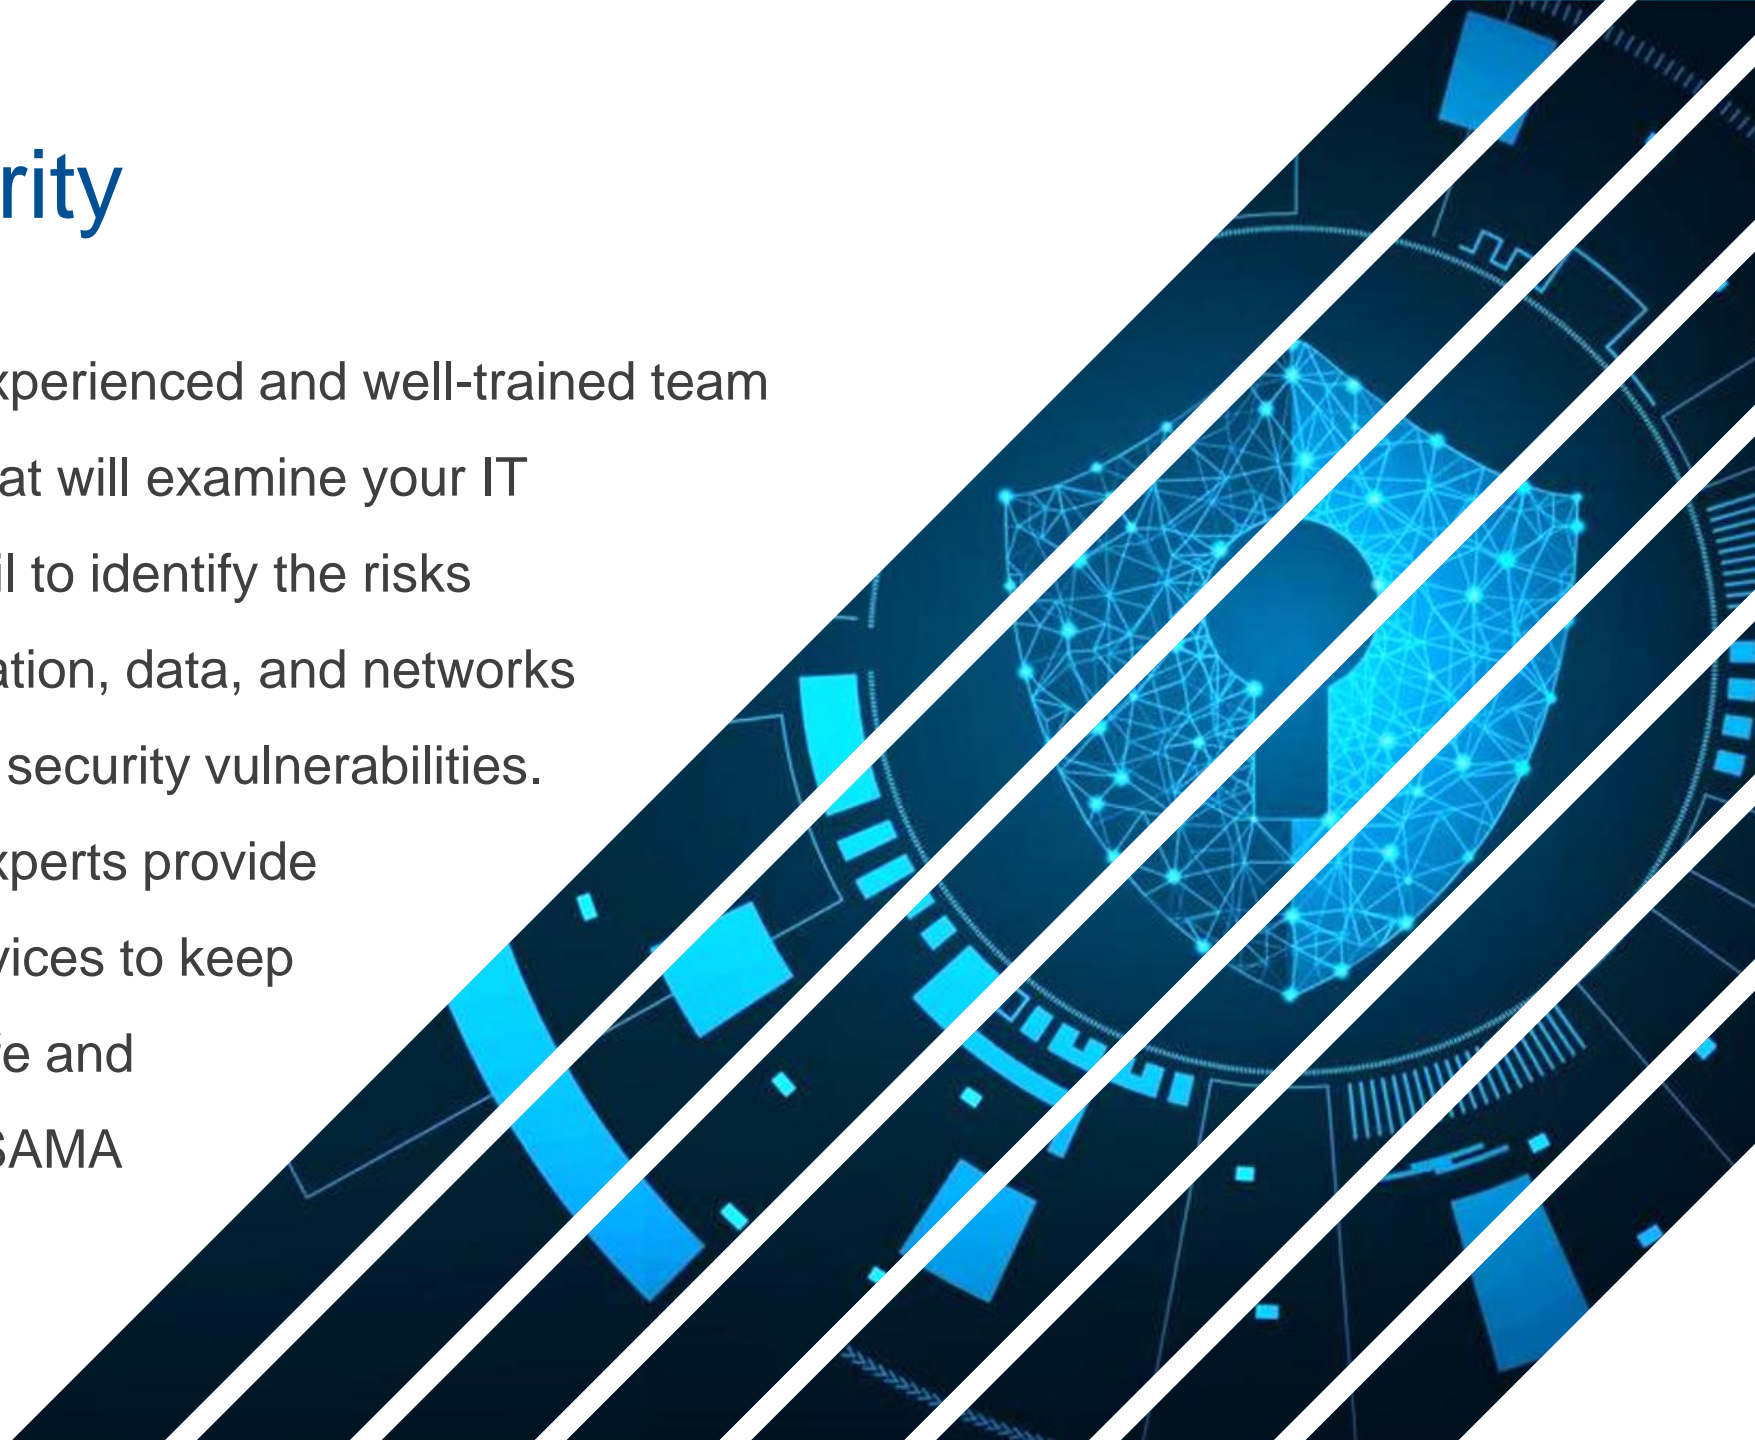

Cyber Security

NourNet brings an experienced and well-trained team of security experts that will examine your IT infrastructure in detail to identify the risks faced by your application, data, and networks from a wide range of security vulnerabilities.

Our cyber security experts provide the best-in-class services to keep your organization safe and complied with NCA/SAMA regulations.

360° Security Fabric

We offer the best cyber security services to filter, monitor, and block any malicious threats, as well as to test and protect the most vital components of your business, including networks, cloud infrastructure, data, applications, and employees.

360° Security Fabric

GRC Programs

Comprehensive cybersecurity assessment based on international and local standards such as NCA, SAMA, ISO, etc.

Vulnerability Assessment

Identifies all potential vulnerabilities that could be exploited in an enterprise including systems and networks.

Penetration Testing

Test your web application, IP address or move ahead with a red team engagement.

Red Teaming

Improve your asset's and personnel's readiness through a realistic security incident drill that can target your organization.

Phishing Test and Cyber Security Awareness

Testing employees through phishing campaigns while helping businesses implement a comprehensive and effective security awareness program.

Managed Detection and Response (MDR)

Make informed decisions by investigating, hunting, responding to, and remediating infrastructure attacks.

360° Security Fabric

SOC as a Service

Proactive monitoring of infrastructure activities 24/7, installing necessary patches and creating timely reports.

User and Entity Behavior Analytics (UEBA)

Detect the slightest anomalies and prevent a minor phishing scheme from escalating into a massive data breach.

Security Orchestration and Automation Response (SOAR)

Automate repetitive tasks, investigate and respond to security incidents in seconds.

Brand Protection

Detect online abuse, analyze, and prioritize it on a global scale, and implement effective strategies to safeguard your brand.

Digital Forensics and Incident Response (DFIR)

Contain critical security incidents and conduct forensic analysis to find out the attack root cause and help in resolving the attack impact.

Threat Intelligence

Monitoring the threat landscape, brand reputation and IP leakage while providing aggregated threat feeds.

360° Security Fabric

Network Detection and Response (NDR)

Monitoring of organization's network by collecting all traffic while using behavioral analytics and AI to detect and respond to threats and anomalous behavior.

Web Application Firewall (WAF)

Protect your web applications by filtering and monitoring HTTP traffic between a web application and the Internet.

Endpoint Detection and Response (EDR)

Prevent malware infection, detect, and defuse potential threats, and automate response and remediation with customizable playbooks.

Secure Web Gateway (SWG)

Enforce granular policies and prevent threats from accessing web applications by screening web and internet traffic at the application level.

DDoS Protection

Prevent any hardware crashes, sudden network slowness or unavailability of your online services.

Mobile Device Management (MDM)

Monitor, manage and secure employees' devices that are deployed across multiple operating systems being used in the organization.

360° Security Fabric

Cloud Sandboxing

Inspecting unfamiliar files for advanced threats such as zero-day campaigns and tackle malware that can trick traditional sandboxing solutions.

Data Privacy

Reduce security risks by applying multiple techniques from encryption, screen water mark, anti-copy and more.

Data Loss Prevention (DLP)

Ensure that sensitive data is not lost, misused, or accessed by unauthorized users.

Content Disarm and Reconstruction (CDR)

Processes all incoming files, deconstructs them, and removes all elements that do not match firewall policies.

Email Security

Premium quality filtering of incoming and outgoing emails to protect users from spam, malware, viruses and phishing activities.

Multi Factor Authentication (MFA)

Protect Applications by verifying user identity before granting access with a simple, streamlined login experience for every user and application.

360° Security Fabric

Identity Access Management (IAM)

Securely control access to your organization's resources by managing users and allow or deny their permissions.

Privileged Access Management (PAM)

Manage, monitor and control the activities of privileged users in an enterprise network. It ensure protection through access management, password policies, suspicious activity detection, etc.

Collaboration

Collaboration Services

Transform your business entire collaboration environment and empower your employees with the best tools through NourNet collaboration services.

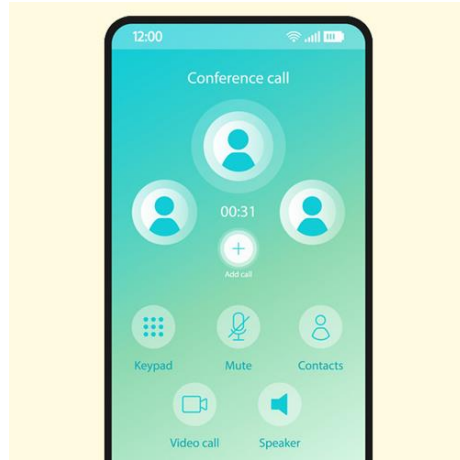

Collaboration Services

IP Phone

With NourNet IP Phone Services, you don't need any specialized hardware, All you need is an Internet connection to make your calls.

Audio Call Conferencing

Increase employees' productivity by allowing them to collaborate at anytime from anywhere using NourNet Audio Call Conferencing Services.

Video Conferencing

NourNet can help you arrange different types of online meetings using the best video conferencing technologies to enhance collaboration.

Digital Event Management

Engage and interact with clients in your virtual events. by relying on NourNet latest Digital Event Management Services.
