

# Extend Microsoft's Security Capabilities Enterprise-Wide with Saviynt

## ABOUT OXFORD COMPUTER GROUP'S MICROSOFT ENTRA ID AND SAVIYNT ASSESSMENT:

This 2-5 day assessment from OCG will show how Microsoft Entra ID's governance capabilities integrate with Saviynt to provide comprehensive identity lifecycle management, application access, identity governance, and more.

### *Saviynt + Microsoft Entra ID together can address challenges like:*

- Provisioning and deprovisioning for quick and efficient user onboarding and termination
- Access verification and attestation
- Application access risk profiling
- Building robust identity workflows
- Compliance issues

## WHAT WE OFFER

Saviynt's Identity Governance and Administration (IGA) platform extends and complements Microsoft Entra ID's governance, adding intelligent access requests, risk-based access certifications and group management with actionable continuous compliance controls & near real-time remediation.

This Assessment, which will be 2-5 days depending on your requirements, will evaluate your organization's governance needs, assess your risk profile, and provide prioritized recommendations for implementing an enterprise-scale IGA solution with Saviynt and Microsoft Entra ID.

The Assessment will include targeted discussions with your organization's IT, HR, Security, App owners, C-level executives, and governance/risk steering committee to discover identity lifecycle pain points, compliance, and auditing risks, and other IGA challenges.

## WHY OXFORD COMPUTER GROUP?

OCG has a 20-year track record of solving complex enterprise identity, governance, and security challenges. We have won the Microsoft Partner of the Year award 8 times and have been Saviynt's Impact Partner of the Year twice. We design and develop innovative solutions focused on delivering business value. We assess architectures and processes, and make recommendations designed to support strategic objectives. To accelerate deployment, we use our proven methodology, best practices, and a unique library of code developed during 1000+ projects.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
