

# Dynamics 365 Business Central and Power BI

“See your data in new ways and make informed decisions quickly with Power BI.”

- Create a Data Culture
  - Connect directly to your data – on premises or in the cloud, real-time.
  - Ask questions in natural language, and predictive visualizations.
  - Custom visuals with open framework
  - Uncover predictive patterns, and trends hidden in your data.
- Collaborate and Share
  - Publish reports and dashboards, collaborate with your team, and share insights inside and outside of your organization.
- Power Query
  - Simplify data ingestion, transformation, integration, and enrichment.
  - Create reports using built-in visuals, or create your own custom visuals.

## Advanced Analytics and Business Intelligence at Your Fingertips

Connect to hundreds of data sources, and visualize all your data with live dashboards and reports. Then share insights across your organization to fuel intelligent action. Power BI enables you to develop deep, actionable insights, and manage user access and security from one central place.
