UST ContineoHealth

Epic in the cloud

ustcontineo.health

Digital health transformation starts with UST ContineoHealth Cloud

Together with Microsoft Azure we go beyond managing current IT assets and infrastructure to prepare you for future demand spikes with Epic EHR.

UST ContineoHealth Cloud moves entire Epic EHR onto the cloud while maintaining industry-leading resilience, ultra-low latency and best-in-class service performance.

We have helped over 100 healthcare clients use cloud to enhance business agility, increase operational efficiencies, and optimize resource utilization and cost structure.

UST ContineoHealth's ground-breaking cloud platform and services allow organizations of any size to move entire Epic EHR on cloud while maintaining industry-leading resilience, ultra-low latency and best-in-class service performance.

Service features

- Plan, migrate, integrate, optimize and manage Epic in the cloud

- Personalized 'white-glove' delivery that meets your organization's needs

- Managed by Epic-certified staff

- Dedicated Customer Success Manager

UST CONTINEOHEALTH PLATFORM AND SERVICES FOR EPIC

The most demanding healthcare applications require the highest standards of availability, scalability, security, compliance and business continuity. Ours is an industry first, end-to-end solution that harnesses the power of the public cloud to deliver disaster recovery or an entire Epic instance on the cloud.

Platform features

- Enhanced comprehensive compliance and infrastructure focused on HITRUST CSF, HIPAA compliance and end-to-end data security

- High scalability up to 75,000+ concurrent Epic users and the ability to grow multi-fold

- Host ancillary and supporting applications alongside Epic platform

- Extreme performance, up to 10X faster, for any workload

- Cost benefits beyond public cloud for any comparable high IOPS cloud storage solution

certified cloud and Epic specialists

UST ContineoHealth Cloud advantage

STABLE COSTS

With UST ContineoHealth, you get:

• Predictable costs without performance degradation and inconsistencies

• An AI-driven engine with the ability to flex to shifting workload volumes automatically

• Ability to avoid the high costs associated with the overprovisioning of IPOS and on-premise infrastructure purchases

SECURE AND COMPLIANT

Access industry-leading compliance and cyber-security ecosystem to secure data to the highest standards. HITRUST CSF and HIPAA-ready hosting ensures security of data and protected health information (PHI).

FOCUS ON PATIENT CARE

With cloud managed services we handle Epic EHR hosting and infrastructure management so your IT staff can focus on strategic initiatives. UST ContineoHealth takes care of day-to-day operations like software patches and upgrades. You can refocus your organization's core IT talent on critical patient-centric innovations while still owning and staying in control of your data.
