Azure IoT platform for EcoStruxure for Food Retail

Schneider Electric presents **EcoStruxure for Food Retail,** a game-changing portfolio of solutions for a food retail brand to thrive in the omnichannel world. Digitize operations into a single integration platform, make the invisible, visible and maximize value amid disruption.

EcoStruxure™ for Food Retail

With our EcoStruxure for Food Retail, you can have unique advantages to unleash value across the lifecycle.

- Understand energy consumption; Visualize data across stores; Ensure compatibility; Optimize HVAC controls; Decarbonize; Integrate monitoring and security; Secure IT; Access remote maintenance and fast support; Refrigeration.

Schneider Electric has a complete stack to enhance efficiency in all aspects of your food retail business.

For Business Owners:
- Cost efficiency; Drive energy savings & Increase brand value

For Operators and employees:
- Reduced equipment failure; Save time; Automated systems & Expert support and services

For Customers:
- Seamless shopping experience & Enhanced safety

Hyper efficient

Redefining 'seamless experience', manage your operations across your entire portfolio in one single platform, and experience the seamless convenience of EcoStruxure for Food Retail.

You can reduce unscheduled maintenance by up to 15% by enabling Hyper-Efficiency for smooth and optimized operations.

Resilient

Your supermarket store can always be 'On' because EcoStruxure for Food Retail ensures service continuity and agility in operations.

You can reduce downtime by up to 12% after implementing Schneider Electric Solution by enabling Resiliency for an uninterrupted shopping experience.

Sustainable

EcoStruxure for Food Retail not only improves cost efficiencies, but also reduces waste to help your business make a positive climate impact.

You can reduce greenhouse gas emissions by up to 12% by enabling Sustainability for less wastage and even better energy management.

"Schneider Electric's expert team has been able to meet our expectations by listening to us and adapting their solutions to our stores' configurations. We intend to deploy this solution in all our Egypt locations. Together, Schneider-Electric and Carrefour Majid al Futtaim, can work to reduce the carbon footprint on our planet for future generations"

**Jean-Luc Graziato
Managing Director, Carrefour Egypt**
