

AZURE DATA PLATFORM BLUEPRINT WORKSHOP

Get the Most Out of Your Azure Cloud

Only 20% of organizations give their employees the tools to make decisions based on analytics.¹ A modern data foundation sets the stage for this enhanced decisioning and innovation with the Azure platform.

Paradigm’s data platform blueprint workshop complements your business strategy, making the most of people, process, and technology to further your cloud-driven digital transformation journey.

Paradigm sets you up for success in rapidly creating and launching a next-gen modern data foundation. Trust you’re building within organizational compliance to speed up development and delivery.

Key Benefits

- Agile and futureproof path to enterprise data strategy
- Lower operating costs
- Critical decisioning via timely insights for quicker time-to-market

Identify the Unique Components of Your Ideal Data Platform

- ✓ Ingestion Layer
- ✓ Persistence Layer
- ✓ Analytics Layer
- ✓ Consumption Layer
