

M365 Copilot Data Protection with Microsoft Purview

Microsoft Partner

Get the toughest data protection today using Copilot – the best Microsoft has to offer today.

Let Cyclotron help you take advantage of the existing Microsoft security, compliance and privacy solutions that you already have.

SCOPE

Prepare for Microsoft Copilot capabilities to train only on appropriate business data, excluding sensitive information from use:

- PII
- Financial information
- Proprietary data
- Your custom data types

OUTPUT

Purview deployed to detect sensitive information and exclude it from Copilot analysis, in preparation of Microsoft's filtering controls

WHY

- Ensure PII and other sensitive information types are not surfaced by Microsoft Copilot
- Filter proprietary data from AI use

[Reach out to us](#) to learn more about our Copilot Data Protection with Purview services, or anything security.
