WIZARDcyber

What We Do

We are a global cyber security company with a strong presence in the UK, USA, and the Middle East. Originating from London, we now deliver sophisticated and cost-effective cyber security solutions to enterprise organisations across the globe

At Wizard Cyber we specialise in the provision of advanced threat detection and response systems combined with a unique outsourced management service that monitors your security on a 24/7 basis. Our customers trust us to provide practical, flexible and affordable solutions to protect and mitigate against the risks of cybercrime

Managed Detection and Response

Our Managed Detection and Response platform is powered by Microsoft technology and backed up by our 24/7 SOC, Microsoft Threat Experts and highly skilled SOC analysts

vCISO

Our Virtual Chief Information Security Officer (vCISO) service is the perfect solution for growing businesses. It delivers guidance to business leaders and technical expertise to support IT teams

Cyber Security Reviews (CSR)

A cyber security review provides an independent and in-depth assessment of the ability of an organisation to protect its information assets from the impact of cyber threats

Cyber Security Consultancy

Our cyber security consultancy service is available to all organisations that need advice and guidance on securing their organisation. Our focus is to secure our clients' information, technology, and networks from the many threats that they face

Managed Web Application Firewall (WAF)

Our Managed Web Application Firewall (WAF) Service helps detect, monitor and block malicious HTTP/HTTPS web requests. The service detects and mitigates potential web application attacks to protect against malicious intent

Managed Firewall Service

Our Managed Firewall Service provides full management of your organisation's firewall infrastructure. We monitor and maintain your devices so you can spend your time on more important tasks

Cyber Security Services

Wizard Cyber are a global cyber security partner providing a complete range of managed and consultancy services. From a managed SOC or XDR solution to pen testing and certification support, our bespoke approach ensures your organisation always gets the outcome it is looking for

Discover how we can help your business reduce costs, achieve 24x7x365 protection, and gain access to a team of dedicated, Microsoft-certified cyber security professionals

Detection & Response

Our detection & respond services leverage advanced AI and machine learning to create a complete cyber security service that detects, investigates, and responds to cyber threats, 24x7x365

Managed Services

Our range of managed services enable your organisation to utilise top-class cyber security infrastructure at a fraction of the cost of running it yourself

Assessment services

Our cyber security assessments provide an independent and in-depth review of your organisation's cyber security and identifies any vulnerabilities

Consultancy Services

A variety of consultancy services for organisations that require assistance with incident response, Microsoft Sentinel, CISO support, and much more

Penetration Testing

Ensure your every aspect of your infrastructure is prepared for any cyber-attack with our complete range of penetration testing services

Compliance

Fulfil compliance and regulatory requirements with our consultancy and implementation services, including CMMC 2.0, ISO 27001, NHS DSP Toolkit, and much more
