

Your services partner for
Cloud Transformation

Making the world more reliable through the design, automation and operation of Cloud Critical Digital Platforms.

Born before the cloud in 2001, we have matured our expertise in **Cloud Architecture, SysOps, DevOps and SecOps**. We apply our cloud technology knowledge to run the critical infrastructure of our customers' businesses.

Wherever you are along the **digital transformation** journey, CAPSiDE can help you. Whether investigating, starting or executing cloud adoption, CAPSiDE will be there with you every step of the way, perfectly combining agility with stability.

Sharing quality, skills and experience

- Focused on IT critical services, **we manage more than 16,000 business & architecture services** for more than 180 clients worldwide.

Industrialised and vendor neutral

- We work with the technologies and providers that **best suit** the requirements of each business, project or client, both in technical and economic terms.

Customer intimacy and technical excellence

- **With no call centers** and a single support tier, have direct access to our top-notch engineers, who will manage your requests and doubts.

Training

Courses and official certifications

Our team of engineers, trainers and evangelists, share their vast experience in real-life projects to help skilling up those around us.

On technologies including:

- **Amazon Web Services**
Official Training Partner
- **Microsoft Azure**
Official Training Partner
- **Docker**
- **Microservices**
- **Big Data**
- **Cloud architecture**
- **Design of highly scalable applications**
- **Personalised trainings**

Architecture

Addressing core-business challenges through deep technical know how

Our experience in Cloud architecture allows us to support all directions a customer journey may take.

Our team can understand your business at the enterprise level to plan for strategic change.

We can design, implement and operate all aspects of the provider technology while advising the impact of optimisations utilising the latest features.

SysOps

Your IT platform always available, optimised for maximum performance

24x7 SysOps & SysEng ensure your business never stops. Our single support tier keeps systems architectures available, scalable, performant and secure.

Our TAaaS (Technical Architect as a Service), SDM (Service Delivery Manager) services help you through operational, tactical and strategical change.

We provide Critical Event Management with real-time support during business-critical events while ensuring maximum value through customised financial and economic models.

DevOps

Application release automation: by Ops & Devs for Ops & Devs

Our DevOps mindset provides you with a suite of composable tools, including ENZIME™.

Initially designed, developed and battle-tested for internal use, our technology improves the agility and reliability of our customers.

With both APIs and point-and-click interfaces, our tools simplify critical Cloud automation processes such as safe continuous deployments workflows.

SecOps

Governance, prevention, detection and response of security events

We manage customer solutions under an ISO-compliant way, helping our customers understand their responsibility across the shared security model.

Working side by side with Ackcent Cybersecurity, CAPSiDE provides advanced managed security services, by regularly auditing platforms for continuous improvement advisory and riskless operation.

We provide our services to relevant companies whose IT architectures are critical for their business. Some of them are:
