

# ehCOS CLINIC

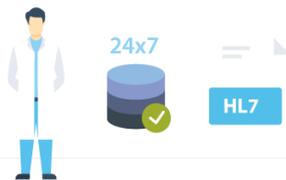

Maximizing value to improve health outcome

All the major functionalities required for healthcare processes.  
Efficient & easy to use for healthcare professionals  
Fast implementation with the latest technological trends and standards.

## What is ehCOS CLINIC?

An intuitive and flexible patient-centered Electronic Health Record (EHR) solution containing all the major functionalities needed for clinical processes. The perfect tool for improving healthcare processes and outcomes, increasing satisfaction in patients and healthcare professionals, while offering significant savings thanks to its efficiency and high return on investment.

**Full clinical functionality**  
**Safe & easy to use**  
**Powerful interoperability**

## Making it Simple

- Fast track implementation
- High Usability & rapid adoption
- Affordable monthly payments

## Making it Reliable

- Protection and privacy of data
- Interoperability & continuous updates
- 24/7 tech support

## Making it Valuable

- Ready-to use clinical content
- Fully functional world-class EHR
- Personalized reports & nursing scales

**Technology at the service of people and not the other way around**

**A robust, secure and high performance solution**

**Optimizing your processes with the best practices**

An extremely user-friendly tool that supplies information in an organized and systematic manner, which is key to optimal healthcare service development and planning. Not only we will have systematized information about our own work, but also those that feed us, such as the primary care level.

Rolf Herber. General Director of the Ajusco Medio Hospital
